BROWN TOPS UNDERFOOT

New York—(U.P.)—The whole family of browns takes over in carpet colors for 1956. The Carpet Institute reports. It says all shades of beige are abundant, with the emphasis on the rosy tones. You'll hear terms like sandalwood, cinnamon, wheat, mocha, cocoa, nutria, butternut and even mink used to describe the various shades of browns. Look also, the institute said, for increasing popularity for the gold and copper tones.

New Device Helps Pilot: Smooth Bumps

Washington—(U.P.)—The U.S. aircraft industry has developed a new electronic device which helps smooth out the "bumps in the sky" for jet pilots. This electronic co-pilot helps keep the jets on their course when they zoom through the skies at high speeds.

Planes, official publication of Aircraft Industries Association, says the reaction of a jet plane pilot hitting an air bump is similar to a man driving an automobile without shock absorbers over a wash-board road at 80 miles per hour. The air bump, however, is caused either by natural air currents or other air disturbances.

The publication points out that at present speeds of more than 600 miles per hour, before the pilot could correct the roll, pitch or yaw, his plane might be rendered ineffective before he could fire a shot.

This new electronic device, however, automatically adjusts the controls of the plane when it strikes an air bump and keeps it flying on an even keel. The plane still rolls on the first shock, but then smooths out quickly, returning to level flight.
