Applications Filed To Protect SS Rights

A total of 495 applications to protect the social security benefit rights of disabled workers have been filed with the Medford office of the social security administration, W. V. Nusbaum, district manager, has announced.

The applications were filed under the disability provision of the 1954 amendments to the social security act which permits "freezing" the account of totally disabled workers under 65 during their periods of disability.

Applications prior to June, 1957 will be retroactive to the original date of the disability, Nusbaum said. Applications taken after June, 1957 will be retroactive for a period of only one year.

Leaflets explaining the disability "freeze" are available at the Medford social security office at 33 North Riverside ave.

Albany Zirconium Production Slated

Washington — (U.P.) — The Atomic Energy Commission has ordered the construction of three new plants to produce zirconium for the rapidly increasing demands of the nation's atomic programs.

The plants will be built at Parkersburg, W. Va., Pensacola, Fla., and Ashtabula, O. They are expected to turn out some 11 million pounds of high purity zirconium metal in a five-year period.

The AEC also announced that the Bureau of Mines plant at Albany, Ore.—the pilot zirconium production plant in this country—is being reactivated to produce about 300,000 pounds annually beginning in August. The plant will be operated by the Wah Chang Corporation under a contract which will expire June 30, 1958.

For MOTHER'S DAY . . .

Milk Glass . . . by

The pieces we show might be right out of a collection of antique milk glass. They have the same mellow look—and there's a reason for it. Fostoria makes milk glass in much the same way it was crafted in early times—by hand. We show just a few pieces here; we hope you'll come in and see them all. They're a charming choice for gifts, or for your very own pleasure.
