

DANGEROUS BUSINESS—While a camel surveys the scene, a French gendarme, identified as Sgt. Maj. Mestri (right), and companion search Arabs in front of a cafe in Algiers. Later in the day, while en route between Algiers and nearby Keddara, Mestri was killed by rebels and his companion seriously wounded.

facilities. This is provided for in the parking meter ordinance. Traffic control also is mentioned to share in the funds. However, such funds, the committee believes, must be found elsewhere. If they cannot be, off-street parking funds will have to come from tax sources—or thoughts of such a program must be abandoned. The committee presumes that a logical accounting system would put all meter revenue and all parking violation bail money back into parking facilities, and that traffic control would be maintained from moving violation fines. 9. The committee believes that taxing will not be necessary. The sale of revenue bonds, to be repaid entirely from parking fees, is envisioned, however. The committee recognizes that lot purchases amounting to \$100,000 or more may be necessary, and, in this case, revenue bonds are the only feasible method of purchase. Leases of from three to ten years duration should be considered, especially for smaller lots.

Albany Chamber of Commerce Asks City for Parking Authority

The Albany, Ore., Chamber of Commerce last week recommended to the Albany city council that a permanent parking authority, composed of three to five men, be named to administer an off-street parking program. The Albany situation in some ways is identical with that faced by Medford in regard to obtaining off-street parking in the downtown area. The chamber's 12-point report to the council, in addition to asking the city to work with it in solving the problem, outlined what it felt to be necessary in developing an off-street parking plan. Excerpts from the report follow:

1. The present city lot is not being used to maximum advantage, particularly on week days. Its access should be improved and the lot should be enlarged, clearly indicated, unobstructed entrances. 2. Lots should be secured throughout the downtown area and should be no more than 500 feet from any point of need. 3. Lots farther, but only slightly so, from the trade center, are needed to accommodate regular all-day parkers who otherwise would jam facilities for shoppers. 4. Attempts should be made to option lots around the periphery of the present business district to provide for future expansion. 5. The situation in other areas should be watched closely and provision should be made for parking when it becomes obvious that it will be needed in any locality in the future. 6. There are many indications that workers, when allowed any choice at all, will seek to park almost as close to their places of employment as shoppers. Other cities have learned that

unless cared for, downtown employees will use up valuable customer lots. Experience elsewhere has shown that if at all possible some weekly or monthly rental stalls should be provided in the central lots. In Albany some merchants report that their employees would rather plug meters than park even a block or block and a half away. Therefore central lots and those nearer the edge of the district should have two types of parking—probably metered and monthly rental. 7. It is probable that private concerns also can supply some parking areas if they can be operated at a profit. 8. Obviously, this assumes that all parking meter revenue not now being used to pay salaries and expenses incurred in enforcement and maintenance of the meter system should be earmarked, beginning with the 1956-57 fiscal year, for parking

facilities. This is provided for in the parking meter ordinance. Traffic control also is mentioned to share in the funds. However, such funds, the committee believes, must be found elsewhere. If they cannot be, off-street parking funds will have to come from tax sources—or thoughts of such a program must be abandoned. The committee presumes that a logical accounting system would put all meter revenue and all parking violation bail money back into parking facilities, and that traffic control would be maintained from moving violation fines. 9. The committee believes that taxing will not be necessary. The sale of revenue bonds, to be repaid entirely from parking fees, is envisioned, however. The committee recognizes that lot purchases amounting to \$100,000 or more may be necessary, and, in this case, revenue bonds are the only feasible method of purchase. Leases of from three to ten years duration should be considered, especially for smaller lots. 10. For leases and small purchases, funds now in, or soon to be collected into the parking meter funds could be used at first in small purchases and in leases. 11. Later, of course, combined income from all on-and-off-street facilities would be used for leases, small purchases and for retiring bonds. At all times, curbside and off-street facilities should be managed as part of the whole. This is necessary if the program outlined is to be possible. 12. The goal must be to accommodate peak parking periods. Albany's present mid-day, mid-week, parking situation is not acute. But the period between 4 and 5:30 p.m. is bad as are Saturdays and entire month before Christmas. These are the times when farmers and other shoppers from out of town form their opinions of Albany. If it is jammed on these days, an effective ceiling is placed upon the quantity of retail trade. Accommodation of slack period shoppers is never a problem; the goal must always be to provide for a greater maximum. Otherwise all promotional efforts are wasted. The Dead sea contains 23 to 25 per cent salt. The oceans have 4 to 6 per cent.

Girl Scouts To Hold Picnic

Girl Scouts of Washington neighborhood will hold the annual court of awards and Brownie fly-up with a picnic at TouVelle State park Saturday, May 19, from 10 a.m. until 2 p.m., according to Mrs. Kenneth Howe, neighborhood chairman. Flying up will be Troop 172, led by Mrs. Charles Rowan; Troop 173, led by Mrs. R. C. Meyers; and Troop 176, led by Mrs. R. A. Anderson. Fifth grade Troop 180 will receive second class badges; the leader is Mrs. Victor Taylor. Troop 36, sixth grade, will receive cooking, homemaking and hospitality proficiency badges. Troop 36 is led by Mrs. E. M. Cooksey. Mrs. T. R. Lytle, first class dinner district chairman of the Rogue Valley Area council, will be speaker for the affair.

Plan Ceremony Griffin Creek neighborhood Girl Scouts will hold the annual Brownie fly-up and court of awards in the school cafeteria Monday, May 21, at 7 p.m., according to Mrs. J. E. Moir, neighborhood chairman. Fourth grade Troop 37, led by Mrs. Rex Johnson, will receive the fly-up wings; Troop 80, fifth grade, led by Mrs. Richard Ball,

Hitchcock Claims 'First Real Blood'

Portland —(U.P.)— Republican senatorial candidate Philip Hitchcock claimed to "have drawn the first real blood" in the current campaign here yesterday when he said he had received a formal demand from a Democratic leader that he withdraw a statement he made concerning Sen. Wayne Morse's Senate attendance record. Hitchcock said he had received a telegram from Democratic National Committeeman Monroe Sweetland, demanding that he retract statements he made concerning the senator's attendance record in a TV appearance Monday night. Paul Hebb, state campaign manager for Hitchcock, said "here's conclusive proof that Mr. Hitchcock can keep Morse on

Boy Found Dead In Old Refrigerator

New York —(U.P.A) five-year-old boy was found dead Tuesday night in an abandoned refrigerator across the street from his home in Rockaway Park. Ivison Austin Jr. apparently was a victim of his own curiosity. His mother, who is expecting her eighth child, reported the boy missing after he failed to return from school. Patrolman Arnold Casden, one of more than 30 policemen assigned to a search for Ivison, found the body. Police said the youngster probably crawled into the refrigerator, which was lying on its back, and the door locked automatically, trapping him inside. There are at least 350 kinds of the common "lead" pencil, manufacturers say.
