Hoover Says Reds' 'New Look' Posing Free World Menace

Washington — (U.P.)—FBI Director J. Edgar Hoover and 39 experts on Russian affairs warned today that the Soviet Union's "new look" policies and tactics present "a menace to the free world greater than Stalinism itself."

Their views were expressed in a symposium on anti-Stalinism and the 20th Congress of the Communist Party. The symposium was published Saturday by the House Committee on Un-American Activities under the title, "The Great Pretense."

"The Communist leopard frequently changes his spots, but the same blood—bad blood—continuously flows through his veins," Hoover said in the 173-page report. "Josef Stalin, who ranked with MARX, Engels and Lenin as an untouchable saint in the godless Soviet temple, has been exposed by his own worshippers as a power-crazed tyrant, a pathological fraud and a coldhearted executioner."

This is "another spectacular about-face" in the party line, Hoover added, but "should have been no surprise coming from a movement which has no moral principles, which lives by expediency, and which will make any move to advance the Communist cause."

Committee Chairman Francis E. Walter (D-Pa.), who prepared a summary of the various views, said the 39 contributors stood together on these major conclusions:

1. "The current policy and tactics of the Soviet Union present the greatest danger ever to confront the West."
2. "Current developments in the Soviet Union are a reflection of growing strength and confidence rather than weakness."
3. "The policy of anti-Stalinism proclaimed by Nikita Khrushchev does not denote abandonment of the messianic Soviet program of universal conquest."

Firemen Battle Mill Flames in Eugene

Eugene — (U.P.)—Firemen battled flames at three lumber mills in the Seneca district of Eugene Friday for 40 minutes after fire started in one of the mills and spread to the adjacent ones.

The fire apparently started in a burner of the Cuddelback lumber mill. The mill was inoperative but the fire spread quickly down a conveyor belt and to about 20,000 board feet of stored lumber. The Star Lumber Company and the Zellner Lumber Company both suffered minor damage when sparks from the fire spread the blaze.

India May Be Developing Generation of Gangsters

Bombay — (U.P.)—India may be growing a new generation of gangsters. This is the fear of many persons in this country, which is committed to a policy of prohibition.

The nation has not gone completely dry yet. Prohibition is making greater progress—legally—in some provinces than in others. But the number of "dry days" is increasing and India's leaders appear convinced they are on the right path.

Not all of the people are equally convinced. There is a lot of complaining, and there is more and more bootlegging. "India's leaders always are talking about developing 'cottage industry' in this country," one Bombay resident said. "Well, they have a new 'cottage industry' now—illegal cottage distilling."
