SAFETY FEATURES? Sure, we've got 'em. But Dodge is designed to keep you out of accidents. You'll find out about "preventive safety" when you . . .

**DISCOVER THE DIFFERENCE IN DODGE!**

Most dramatic proof of "power under perfect control" in automobile history! In 31,000 miles of continuous day-and-night driving at full throttle (like running the Indianapolis "500" 62 times in succession) the '56 Dodge established its claim as the greatest handling car on the road today.

Even the windshield wipers are safer! They're electric—no dangerous "slow down" (like vacuum types) when you step on the gas.

No "guess work" here—it's simple, sure, safe! Dodge push-button driving is mechanically perfect—the safest, surest way of driving! Control panel is out-of-reach of mischief or mistakes.

Takes the terror out of blow-outs! Dodge Safety-Rim wheels let you guide your Dodge to a safe, sure stop.

Dodge power is your "safety ally!" The Dodge V-8 uses aircraft engine principles to put greater break-away power at your command.

Naturally, Dodge has pioneered in special safety-equipment too.

- Safety Seat Belts
- Safety Padded Sun Visor
- Selex-Tinted Safety Glass

These are available at extra cost. However, the preventive safety features described on this page are standard equipment—exclusive to Dodge in its field.
