

Health Workshop Scheduled at SOC

Ashland—For the first time in southern Oregon, a school health workshop will be held at Southern Oregon college, June 11-22, for the purpose of teaching educators how to best utilize the services rendered by public health. Both graduate and undergraduate credit will be given.

Several leaders in the public health field in Oregon will serve as consultants and demonstrate specific services. The staff of the Jackson county health department will participate. Miss Dorothy Huskey, health educator, is director of the workshop.

School health services, correlating school and community programs, and coordination between health and physical education programs and competitive sports activities will be stand-out work areas, as will information sessions on such subjects as physical examinations, health records, screening by the teacher and the public health nurse, hearing, dental health, vision, communicable diseases control, and health department services.

Serving on the planning committee are John Stewart Jr., representing the Classroom Teachers' association; Mrs. Myrna Frink, the Principals association; Ernest R. James, the Superintendents association; and from the health department, Mary Ellen Bell, public health nurse; Dorothy Collard, supervisor of public health nursing; Dorothy Huskey, mental educator; and Dr. A. E. Merkel, health officer.

Turbine Screens Are Being Installed by Ideal Cement Firm

Preparatory excavation is under way for installation of a series of louvre-type fish screens over turbines and fish ladder improvements at the Ideal Cement company hydroelectric plant near the Sam's Valley highway in the Gold Hill area.

The project, estimated to cost in excess of \$150,000, will include installation of a traversing trash rake, six fish screens and a discharge section in the fish ladders, company officials said.

The reinforced concrete and steel screens will be built in a V shape. The wide part of the V, officials explained, will face upstream. As the fish swim to the bottom of the V, they will be carried to a 48-inch concrete pipe through which they will travel past the plant and to the river.

The pipe will be buried about 12 feet below the water level and will start under the bottom step of the fish ladder.

Debris disposal racks will also be installed to keep the louver clear of foreign material and expedite movement of the fish. Company officials said the project has been approved by the fish and game commission and the federal department of wild life. Bids have been called on the job and will be opened on June 25.

The job is expected to be finished by next fall. The power plant will be shut off and the canal drained during the construction.

Important Project
Sportsmen in this area have long felt that such a project is

second in importance only to the installation of fish screens at Savage Rapids dam. Both have been blamed for considerable destruction of fish life in the Rogue river, cutting far into possible fish runs, and both spoiling sport and lessening the attraction of the Rogue for out-of-state fishermen and tourists.

Screen of Savage Rapids dam's turbines and canals will be done provided the public works bill, now before the Senate, passes without change. An appropriation of \$208,000 is included in the House-approved version of the bill to construct the screens.

Rainfall Exceeds Last Year's Total

Rainfall in the Rogue valley between September, 1955, and May 31 this year has exceeded the average for the period by 15.71 inches, weather observers at the Medford airport weather station reported Saturday.

Between September and May precipitation has totaled 32.60 inches. Total precipitation for May was 4.18 inches, with the heaviest rain, 1.67 inch, falling May 18.

Rogue valley had 14 cloudy days, 14 clear days and three partly cloudy days during the month. Thunderstorms occurred on five days, May 9, 18, 29, 30 and 31.

Highest temperature for the month was 90 degrees on May 16, 17 and 22. Lowest temperature was 36 degrees on May 1.

Medford Man Buys Ashland Truck Line

Ashland — Arnold Paradis, who has served as Southern Oregon district manager for the Chevrolet division of General Motors in Medford, Friday took over ownership of the Independent Truck line from William E. Kerr.

Paradis, who has lived in Medford for the past year and a half, will continue to provide scheduled daily motor freight service between Ashland and Medford, serving as agent for Consolidated and Pierce motor freight lines. He will provide the added service of local and long distance hauls as an agency for Allied Van lines.

He plans to move with his family to Ashland in the near future.

Committee Approves Operation Budget

Washington—(U.P.)—The Senate Appropriations committee approved a bill Friday carrying \$2,372,281 to operate the Departments of Labor and Health, Education and Welfare in fiscal 1957.

The Senate voted \$75 million more than the House, sending the bill to a conference committee. Nearly \$49 million of the increase would be for expanded medical research by the National Institutes of Health.

The Department of Health, Education and Welfare would receive \$1.97 billion, of which \$1.3 billion would be for grants to states for public assistance. The Labor Department would receive \$380.9 million.

An average U.S. man in a lifetime consumes 33 hogs, 10 lambs, eight steers and four veal calves, according to present meat-eating rates.

Construction Bids Called for Firm Here

Bids for construction of a one-story, 45-by-65-foot office building at the Southern Oregon Production Credit association will be received until 7 p.m., June 8.

The new structure will have a concrete floor slab, SCR brick walls, aluminum sash, glued laminated roof framing with rigid insulation and built-up roof. Interior finish will include asphalt tile on the floors and SCR brick, plaster and hardwood wall paneling.

The structure will be heated and air-conditioned by a heat pump. Architect for the project is Robert J. Keeney, Medford.

RACE RIOT PERILS 1000—Police officer at Crystal Beach, Ontario, takes a Negro girl into custody after rioting broke out which Ontario Provincial police declared was "strictly racial." Rioting again broke out aboard the ship Canadiana on Lake Erie as it was bringing holiday celebrants back from Crystal Beach to Buffalo, N. Y. Margaret Wynn, Buffalo Courier-Express reporter who was aboard the excursion boat, said it was a "nightmare of flashing knives and sobbing, frightened teenagers." She said gangs of Negro girls, wearing jackets with embroidered names of their gangs, roamed the ship attacking white girls, mauling them and tearing their clothes. Of the boat's 1000 passengers, 80 per cent were Negroes. Many of the Negro teenagers who did not take part, said of the rioters: "They are disgracing our race."

Crater High Seniors Awarded Scholarships

Central Point — Seventeen Crater High school seniors Friday night were awarded scholarships during the annual senior awards presentation at commencement exercises.

Nathan Douthit, valedictorian, received a Navy Reserve Officers Training corps scholarship to Harvard and Elk Lodge awards for leadership and scholarship contests. Douthit also received faculty scholarship, and activities awards, the outstanding senior boy award, and the "Jerome" for the best male performance.

Other Scholarships
Other scholarship winners included Maria Abbott, Richard Callender, Donna Eskew, Nadra Moore and Zoe Turner, Southern Oregon college; Bonnie Sears, Oregon State college; Donna Eskew, Oregon Parent Teacher association; Carol Russell, Marylhurst; Vickie Noel, Oregon State college honor recognition; Donna Eskew and D'Anne Clark, Crater High Girls' league; and Vicki Noel and Donna Eskew, Elks lodge leadership and scholarship, respectively.

Donna Eskew received the outstanding senior girl award and the Daughters of American Revolution Good Citizenship award; Juanita Swindler and Joe Shelton received social studies awards, and Joan von der Hellen and Calvin Gillespie, Danforth Foundation awards for citizenship. Donna Eskew also received the Girls' League girls of the year award.

Lola Young was salutatorian, and Norman Barnes received the faculty citizenship awards, and Harold Lefler, the faculty athletics award.

Seniors receiving diplomas Friday included Maria Abbott, Scott Addington, Dewey Anderson, Willard Anderson, Jim Armstrong, Carol Bailey, Loreta Barnes, Norman Barnes, Richard Bickel, Bill Bowles, Ethel Brezland, Beverly Burgoyne, and Netha Byrd. Richard Callender, Alice Cane, Virginia Cellura, Don Chitwood, D'Anne Clark, Samuel Collins, Anita Conger.

Steel Works Having Influence on City

Philadelphia—(U.P.)—The multi-million-dollar Fairless Steel Works in Morrisville is having a tremendous effect on the growth of Greater Philadelphia.

More than 50,000 persons are living in lower Bucks County today because of the U. S. Steel Corporation plant's influence in the area. Many residents have no connection with the firm but are engaged in business which were created indirectly.

Since steel production began in December, 1952, output has often exceeded normal capacity. Rumors that the firm will expand beyond its original 3,800-acre site have been denied by U.S. Steel officials. However, there is much speculation that satellite plants using steel will be attracted to the area. The number of such plants has not been large, but it is believed that growth will occur over a period of years.

4-H Club News

Applegate Sewing Club
Applegate Sewing club held a meeting at the home of Mary Herriottson May 28. We held our business meeting and worked on our projects. We also had recreation and refreshments before adjournment.

The next meeting will be held at the home of Sonja Smith June 9 at 1:30 p.m.

Applegate Knitting Club
Applegate Knitting club held its meeting at the home of Gwen Krouse. We held a business meeting and worked on our projects. Gwen Krouse gave a demonstration on how to use make-up. Luce Sims was her model. Refreshments were served and the meeting was adjourned.

The next meeting will be held at Deanna Lee's home on June 4.

More than 28 million persons in the U.S. play some kind of musical instrument, according to American Music conference estimates.

Montevideo Council Favors Helicopters

Montevideo, Uruguay—(U.P.)—The City Council Friday approved in principle the establishment of a helicopter transportation service in the Montevideo metropolitan area.

The project includes construction of several heliports in various parts of the city.

A "better than ever" potato salad is made by marinating cubed cooked potatoes (either hot or cold) in 1/2 cup white table wine along with the wine vinegar, oil and your usual seasoning. Just before serving, carefully fold in a little mayonnaise and chopped parsley. Good with cold nuts, roast ham or turkey and glasses of the same fine wine as a beverage.

The farm silo is said to have originated in central Europe in 1875 and was introduced to the U.S. a year later.

POPE ILL—Pope Pius XII suspended all audiences until further notice because of fatigue.

The 80-year-old Roman Catholic leader attended a general audience in the Consistorial Hall of the Vatican Palace but did not address the 10,000 pilgrims overflowing the hall. Above photo was made on the pontiff's 80th birthday.

It's Deaver Tractor For Top Hay Tool Values!

IT'S NEW! FORD'S MOUNTED SIDE DELIVERY RAKE

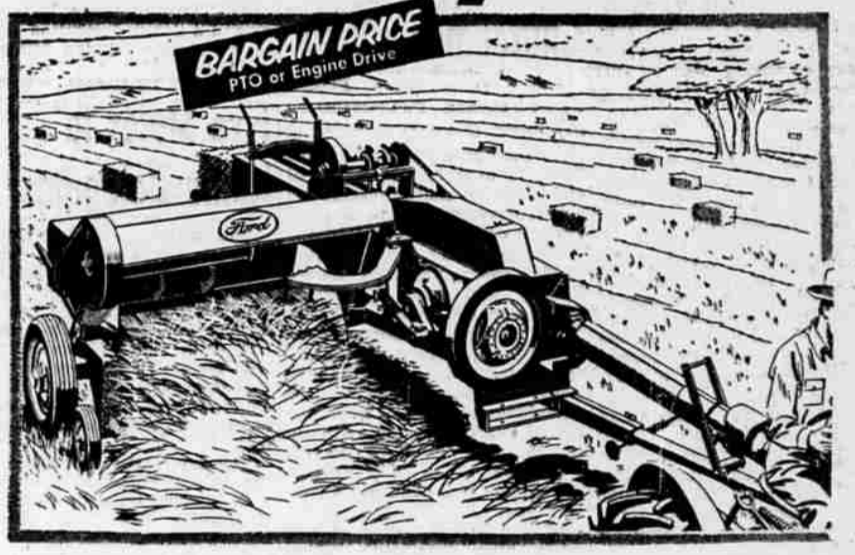

Here's Ford's new Mounted Side Delivery Rake. It means easier operation for you, because the rake is mounted on the Ford Tractor, raised and lowered by Ford's Hydraulic System. It's power take-off driven, and there's a speed change provision to give you correct operation. And it means less leaf shattering because Ford's new reel design moves the hay a shorter distance from swath to windrow. There are many other new features, too, such as the new rotary stripper that does a thorough, uniform job.

IT'S HERE—The new FORD rear-attached MOWER!

Quiet, smooth-running, efficient for TOP MOWING PERFORMANCE
You'll like the way this new mower operates... its ease of mounting and dismounting... its high transport clearance... and above all, its smooth, quiet operation and its fast, clean mowing performance. Easy-to-make adjustments are provided to help you operate at peak efficiency in any crop or condition.
Two models are available to suit your needs. The Ford "56", used with narrow wheel spacing, is excellent for all types of mowing. The Ford "76", used with wide wheel spacing, provides greater convenience in changing from cultivating to mowing, and greater stability for hillside mowing. Both models are available with 6' or 7' cutter bar, heavy duty or standard guards.
See one of these mowers operate... ask for a demonstration on your own farm.

New! FORD "250" Hay Baler

- Floating Pick-Up follows contour of ground—gets all the hay
- Auger and Sweep Fork handle hay fast—saves leaves
- Metering Wheel maintains either 36 or 42-inch bale lengths
- Knotters tie knots that hold—bales are easy to handle
- Safety Head Lock stops plunger if needle gets out of time
- Heavy Duty Gears are sealed from dust and dirt—run in oil
- Twine Can holds 4 balls—enough to tie about 1000 bales
- Anti-Friction Bearings used generously throughout baler

Pays for itself on fewer acres
Now you don't have to grow big acreages of hay in order to justify the cost of an automatic hay baler. The new low-cost Ford 250 Hay Baler in either PTO or engine model will help you to keep your baling costs down. Besides being low in cost, these balers are simple and easy to adjust, operate and maintain. And they do an excellent job of making firm, uniform, well-shaped bales that are securely tied for easy handling and storing. PTO Model is efficient behind 2-plow size tractor. Engine Model is powered with dependable 15 horsepower engine.
