

TIME TO RETREAT—During violent dispute between opposing factions supporting rival candidates in Lima, Peru elections, angry demonstrators wielding knife (arrow) starts in pursuit of La Prensa photographer Jose Acevedo who made this picture. As votes were still being counted, backers of Fernando Belaunde Terry paraded through streets hailing their man as the victor. Supporters of opponent Manuel Prado took exception to the demonstration.

Unclean Facilities Found In Meat Sanitation Survey

Salem — The pilot meat sanitation survey conducted during the program's first round found unclean and faulty walls, trolleys and rails the most common insanitary condition in the 116 plants checked according to M. E. Knickerbocker, chief of the state department of agriculture animal division.

Sixty-nine plants had walls in need of cleaning, repair or paint. Trolleys and rails in 62 plants needed cleaning, oil or paint. Sterilizing facilities were inadequate in 56 plants and hand-

washing equipment was faulty in 53 plants. In the actual handling of the meat itself, 44 plants failed to clean tools or kitchen equipment each evening.

A meat processing plant's water supply also affects the wholesomeness of its meat. Almost 48 per cent of the water samples taken at 80 plants were contaminated.

Most packing plants in the pilot meat sanitation survey followed basic sanitation practices and conditions such as aprons, gloves and clean clothing for workers; adequate doors, ventilation and pickle room equipment; sanitary transportation equipment and only fresh meats in the plant.

With few exceptions, most meat processing plants welcome sanitation studies and the educational work which accompanies the actual meat inspection. Inspectors are now in the second round. The program's directors are anxious to determine of insanitary conditions and practices discovered in the first round have been corrected.

LABORATORY EQUIPMENT
New York—U.P.—Science and engineering students at 40 of the nation's colleges are conducting laboratory experiments with the help of \$600,000 worth of equipment obtained from the General Electric Company's assistance program. Colleges and universities with special problems in modernizing their laboratories may apply to GE for equipment aid.

CARUSO LULLABIES
Detroit—U.P.—Enrico Caruso, 26, not related to the late opera singer, confines his singing to lullabies and he gets plenty of practice. His wife has presented him with a second set of twins.

Manufacture Value In Jackson Shows 66.5 Per Cent Rise

Value added through manufacturing activity in Jackson county in 1954 totaled \$37,637,000, an increase of 66.5 per cent over the 1947 value of \$22,604,000, according to figures by the bureau of census, department of commerce.

The number of employees in Jackson county manufacturing industries rose from 2,878 in 1947 to 4,987 in 1954.

The value added by manufacture is determined by the difference in the cost between the raw material and the finished product.

Josephine county, with a value by manufacture of \$17,451,000 in 1954, showed an increase of 104.5 per cent over the \$8,534,000 value by manufacture in 1947. In Klamath county, the value added through manufacturing increased from \$20,232,000 in 1947 to \$25,835,000 in 1954 or 27.7 per cent.

Payrolls in Oregon
Manufacturing payrolls in Oregon rose to \$564 million in 1954, an increase of 77 per cent between 1947 and 1954. The value by manufacture showed an increase of 52 per cent to more than \$1 billion in 1954, according to preliminary figures.

The greatest increase in manufacturing activity in the state measured in value added by manufacture, was in Curry county, where value added jumped from \$490,000 in 1947 to \$12.3 million in 1954, an increase of more than 2,400 per cent.

The three leading major industry groups in 1954, based on value added by manufacture, were lumber and wood products, \$581.1 million; food and kindred products, \$120.9 million, and pulp, paper and products, \$65 million.

Wheat consumption per person in the U.S. declined from 310 pounds in 1909 to an estimated 173 pounds in 1955.
