### Relief From Hay Fever

Soon those many unfortunate who suffer from hay fever will be sneezing and wheezing and sniffing. Those who have money and do not have to work can go to some place like the north shore of Lake Superior where they can find relief. Those who have to remain in ragweed country can do a few things to help themselves. Some can get help from desensitizing injections, and others can get help at night by sleeping in a room from which the pollen has largely been removed by a filter in the window, or an air-conditioner.

Many years ago I used to correspond with Dr. Van Leersum, a Hollander, who, as I remember, was one of the first men in the world to teach that persons with hay fever and asthma can get help by sleeping in a room containing filtered air. He early sent me blueprints for an inexpensive air-cleaner which he was accustomed to have made for his patients. It consisted of a box in which was a fan that blew air from the outside into the room. On each side of the fan he put a glass fiber type of air filter. The apparatus was placed in the window of the patient's bedroom, and with this, many patients got considerable relief. Such air cleaners no have been made commercially, but many of us do-it-yourself - enthusiasts

### How An Ignorant Swindler Can Keep Practicing Medicine

I recently read in the paper about a man who, in some devious way, obtained a license to practice medicine in a certain state. According to the paper, in 1938 he served a prison term for being in the abortion business. In 1945, with the help of some influence, he overrode the objections of his state medical board and got back his license to practice. In 1949, after an examination, he was reported to be too incompetent to practice as a physician, but since the American people are not interested in having only educated physicians working for them, the man kept on practicing. Later, the Appellate Court of the state ruled, that after a fairly conducted examination he had failed and hence had no right to practice. But the man "knew the right people" and went on with his work.

Soon he was in jail for cheating people; and so, in 1952, his license was again revoked. He had been swindling diabetics by selling for \$30 a supposed "cure" for the disease. It consisted of water with a little vinegar in it!

For the next two years the man kept in practice by appealing constantly to higher courts for a re-hearing. Finally, the Supreme Court of the state decided against him and referred his case back to the Appellate Court. Now the man will doubtless keep out of jail for more years by asking for re-hearings. In the meantime he goes on, presumably gypping people. One can only feel sorry for any unfortunate

person who consults him. According to the state authorities, the man, first, is not competent to practice medicine, and second, is a crook and a swindler.

Why don't I mention the man's name? Because experts tell me that when the health authorities expose a man as a fake doctor and swindler and ex-jail-bird, people feel so sorry for him, being supposedly persecuted by the American Medical Association, that they flock to his door as patients!

After telling in this column of the stupidity of going to cancer quacks, I have had many a man write me saying that a much-loved mother and hopeless cancer, and would I please tell them of a good quack to take her to. Poor fellow: because of his great love and his desperation, he was willing to be robbed of his savings if only he could give his mother some hope, even for a month!

### Cancer Of The Lung

At the recent meeting of General Practitioners, Drs. H. D. Adams, D. P. Boyd, C. R. Souders, and S. H. Jones, of the Lahey Clinic, reported five cases in which powerful radiation had completely destroyed a cancer in the chest. This is good news. But it means that everyone, and especially every former smoker of two or three packs a day, who gets a chronic cough that does not let up, should go quickly for a thorough examination of his lungs. If he waits too long, a good surgeon may still be able to remove the tumor in his chest, but he won't be able to remove scattered daughter - growths (the metastases).

Dr. Alvarez hopes his readers will understand that it would be impossible for him to answer requests for information or to attempt to diagnose by mail. (Released by The Register and Tribune Syndicate, 1956)

### Police Clear 423 Cases Last Month

The city police report for June included 490 cases, of which 423 were cleared. These included major and miscellaneous offense and miscellaneous public reports.

Last year for the same month, the police report totalled 514 offenses and reports with 461 cleared.

Percentage of cases cleared in the two months were 86 per cent this June and 90 per cent last June.

A breakdown of last month's cases included major offenses, 55 reported, 15 cleared, for 27 per cent clear; miscellaneous offenses, 401 reported, 374 cleared, for 93 per cent clear; miscellaneous public reports, 34 reported, 34 cleared, for 100 per cent clear.

Most of the unsolved cases are larcenies and thefts. In the larceny-theft bracket under \$50, 40 cases had been reported and only nine cleared. In the \$50 and over bracket, eight had been reported and one cleared.

Traffic and motor vehicle law violations accounted for 308, the largest number of any one particular type of offense.
