Holland has about 2,000 miles of canals and about 3,000 miles of navigable rivers and channels.

The two men indicated that any expectations now would be premature. However, they said both states are proceeding on the premise that the bridge will be financed by tolls.

A group of truckers raised the question, noting the congresses gave power to the bureau of public roads to review recently completed toll roads and bridges along with those under construction.

Reports on projects meeting specifications will be submitted for consideration of the 1958 congress. It will be an additional grant to the present highway program if congress should approve paying part or all of the cost. Since the tolls would not be imposed until 1960, there would still be plenty of time.

Baldock said that the tolls will not be charged until the new bridge is completed and the old bridge modernized. He said that studies show the structure will be paid off by tolls in eight years or less.

Forest Service Plans Sale of Lodgepole

About 90,000 cords of lodgepole pine and other species of pulpwood on some 77,500 acres of Rogue River National forest timber land in Klamath county is being planned for sale, according to the forest service.

Oral bidding is scheduled for 2 p.m. Aug. 22 at Pacific Northwest regional headquarters, 729 NE Oregon st., Portland. In the Fremont National forest the portion of the sale is about 173,000 acres and includes some 360,000 cords of pulpwood.

The sale was requested by Johns-Manville corporation in connection with the firm's plans to build an insulating board plant in the Klamath Falls area. Officials have indicated that the proposed plant would use some 50,000 cords of wood a year in the manufacture of such products as building board, decorative ceiling panels and wall plank and roof insulation.

Toxophine, Parthion Mixture Successful

A mixture of toxophine and parthion applied by airplane has been most successful so far in combating Army worms in county alfalfa fields according to County Agent W. B. Tucker. Tucker inspected a field Monday in which 10 acres had been sprayed with the following mixture: two pounds of wettable toxophine dust in 20 pounds of water per acre plus four ounces of parathion in 10 gallons of water per acre.

The owner of the field estimated that 16 hours after application, the mixture had killed 80 per cent of the worms in the field, Tucker reported.

Jackson and Josephine county farmers have \$1,623,000 available to them for production and subsistence loans from the Farmers Home Administration for the fiscal year ending June 30, 1957.

The figure was announced by William N. Young Jr., Josephine-Jackson county supervisor of the FHA.

Allotments of either direct or insured soil and water loan funds will not be made to states for the 1957 fiscal year, Young said, both will be drawn from the national pool.

Insured authority of \$25,000,000 has been granted for this type loan plus direct funds as needed. All individual soil and water conservation loans will be processed as insured loans and placed with lenders within Oregon whenever possible.

The national insured loan authority for farm ownership loans has been set at \$100,000,000. In addition, direct funds of \$100,000 have been established for Oregon farm ownership loans.

Applications from qualified veterans will be given preference in the making and processing of loans, Young said. Otherwise, applications will be considered and processed in the order in which they are received.

Texas Soil Burned, Buried in Japan

Tokyo—(U.P.)—Japanese customs and quarantine officials branded Texas soil as "dangerous" Saturday. They banned its import into Japan.

They ordered that 31 pounds of Texas soil be burned to kill any organic matter. The charred remains, they said, will be buried Monday in a vacant lot near Tokyo's International Airport.

The soil from a downtown Dallas lot was air-exposed to Japan by Pollard Simons of the Del Murray Associates advertising agency last month as part of the Tokyo press club's "Texas Night" celebration.

Yoriko Ishii, an employee in the Haneda quarantine office, assured United Press that "we have nothing against Texas soil." "It doesn't look harmful," he said, "but you never can tell."

Ishii said the package from Texas must be "flame-fumigated" with hot coal to kill roots and other organic life in the soil which may carry dangerous plant diseases. Then it must be buried under at least three feet of Japanese ground.

"Under Japanese law, to prevent pests and harmful diseases from coming into the country we must either return foreign soil or burn it and dispose of it," he explained.

A member of the board of the press club said a Texas flag may be erected over the spot where the earth will be buried.

Indian Government Buys Obsolete Planes
Sacramento—(U.P.)—The purchase of 30 obsolete U.S. Air Force training planes by the Indian government for its expanding Air Force was announced Saturday.

A U.S. spokesman at McClellan Air Force Base said 10 of the T6 propeller-driven trainers would be shipped to India from San Francisco in mid-August. He said the remaining 20 were scheduled for shipment in September.

The purchase arrangements were made by Wing Commander T. G. Kelly, air attache of the embassy of India in Washington, and squadron leader P. N. Kahanna, assistant air attache. The Air Force spokesman said he did not know how much the planes were sold for.
