Hillsboro Judge Faces Charge of Unlawful Fee

Hillsboro—(UP)—Judge Harry Seabold of Hillsboro was arraigned in circuit court here yesterday on a charge of receiving an unlawful real estate commission. The judge asked for time to file his plea and was granted until 9 a.m. Monday.

The Washington county grand jury earlier had indicted Judge Seabold on a charge of unlawfully accepting a commission in the performance of his official duties.

The indictment specifically charged the judge with selling county owned property and accepting a \$925 commission on the sale. The transactions allegedly took place on March 27 and April 13 of this year. Made Down Payment

Tim Gardner, Washington county district attorney, said the land was originally sold to Albert H. Erickson of Hillsboro on Aug. 1, 1955 for \$15,500. Erickson made a down payment on the tract and entered into a contract to pay off the balance over a five year period.

Dr. Archie Pittman of Hillsboro and an associate negotiated with Erickson and the county for purchase of the property early this year, Gardner said, and the transaction was handled through the real estate firm of Harry Seabold & Sons, a firm in which Judge Seabold is a partner.

Epileptics Now Can Safely Have Children

St. Louis — (UP) — Epileptic women, for whom pregnancy long has been considered dangerous, are now being assured that they can marry and have children with safety.

Two leading neurologists made this favorable report here to the 8th annual meeting of the American Academy of Neurology, based on a 15-month study at the University of Virginia's medical school.

Seizures in pregnant women can be serious, said Dr. Cary G. Suter and Walter D. Klingman, because they produce generalized convulsions which kill or seriously injure the unborn child and often have disastrous consequences for the mother as well.

Now, however, seizure-controlling drugs and improved treatment offer encouragement for the female epileptic. Furthermore, they said, a more "enlightened" society attaches far less stigma to the disease, which afflicts an estimated 1,500,000 persons in the U. S.

Dr. Suter said that if the pregnant epileptic woman places herself under the care and supervision of a competent neurologist or other physician and "strictly observes his orders," there is little danger and "no reason why she should not give birth to a normal, healthy baby."

Better Nurses Needed, Association Declares

Minneapolis — (UP) — A Minneapolis Nurses' Association says we don't need more nurses but we need better ones.

The number of nurses has been increasing more rapidly than the number of hospital beds, according to attorney Lee Loevinger. He told the Wisconsin State Nurses' Assn. convention that the big job of the profession now is to raise the professional standards of nursing.

Higher standards, he said, would result in better trained nurses at higher pay than present salaries, which he termed inadequate.

There are 153 national forests within the U.S.
