

Health Association Names Director For X-ray Clinic

Mrs. Robert Paris was appointed director of the chest x-ray clinic at the last executive board meeting of the x-ray case finding committee of the Jackson County Public Health association.

Stressed at the meeting was the importance of educating the public of the need and value of a yearly chest x-ray. Although new methods of controlling tuberculosis are efficient, awareness of the dangers of the disease is still highly necessary, it was said.

Colonel William H. Bartlett discussed new means and methods to induce every adult in Jackson county to go to the clinic for a chest x-ray.

Miss Lotus Eaton, nurse at Timber Products company, and John Pullman, director of Jackson County Public Health department, consulted on county TB problems with the other board members. Mrs. Chester Guches, chairman of the case finding committee, Mrs. Henry Padgham, president of the association and Mrs. George Rode, publicity director.

Valley Couple Wed in Portland

Announcement is made of the wedding of Miss Catherine Deuel Vilas to James Collins Hayes on Wednesday, August 1, in Portland.

The bride is a daughter of Mr. and Mrs. Edward Platt Vilas, Route 2, Medford, and the bridegroom is a son of Mrs. James Cresap Hayes, formerly of Medford and now of Portland, and the late Dr. Hayes.

The ceremony was read by Dean O'Rillon of St. Stephen's Episcopal Cathedral at the cathedral.

Winners Announced For Riverside Club

Riverside Bridge club will hold the weekly session Wednesday.

North-South winners for the last meeting were Mrs. O. O. Alenderfer and Mrs. J. P. Vachon, first, 82½ points; Mrs. F. R. Baker and Al Gilhousen, second, 82; Mrs. S. W. Alcorn and T. J. Fuson, third, 70.

East-west winners were Miss Isobel Stuart and Mrs. Gilhousen, first, 59 points; Mrs. George Dean and Gen. J. P. Vachon, second, 57; Mrs. B. B. Hughes and Mrs. M. M. Herman, third, 55.

Patio Party

Altruss club has planned a steak barbecue to be held Thursday, August 16, in the patio at the home of Dr. and Mrs. S. Ralph Dippel, Eastwood drive. Members attending are asked to take steak for themselves, husbands and guests, and table service.

Women's Page

Guests Here

Millards Visit Daughter in Salem

Eagle Point — The Rev. and Mrs. D. E. Millard have returned to their home after spending several days in Salem with their daughter and son-in-law, Mr. and Mrs. Eugene E. Olson.

The Olsons' third child was born July 31 during the Millards' stay in Salem. The infant weighed eight pounds and two ounces and has been named Barbara Dell, the middle name being her grandfather's name.

The Olsons have two older sons, Paul and Peter. Mrs. Olson is the former Joan Millard.

Sunshine People Hold Initiation

Miss Bobbie Davidson was initiated at the last meeting of Talisman Rosebud council, Pythian Sunshine Girls.

Miss Annice Black has resigned from the organization and Miss Cecilia Fichtner was named royal warder to replace her.

Home Economics Club Announces Meeting

Griffin Creek Home Economics club will meet at the home of Mrs. N. E. Harper, 1599 South Columbus avenue, Thursday, August 16, at 1 p.m. Dessert will be served.

Oven-Cooked Rice

Using the oven of your gas range for meat? Let it cook the rice to go with it, too. Melt one-third cup of butter or margarine in a large skillet and brown one-third cup of chopped onion. Stir in one cup uncooked rice and let this brown. Now add one can of condensed consommé and one-quarter cup of water. Cover and slide in the oven of your gas range to bake for three-quarters of an hour or until all the liquid is absorbed. Yield—four generous servings.

Visitors Attend Plays in Ashland; Teacher Returns

Dr. L. G. S. Willis, professor on the faculty of the University of Washington, Seattle, and Folger Brinks, Yale student, left Medford yesterday morning after having been guests in Medford of Mr. and Mrs. J. P. Tobin, 1435 Euclid avenue.

The Tobins and their guests attended the Saturday and Sunday evening performances of the Shakespearean festival in Ashland. Dr. Willis, who teaches courses in Shakespeare at the University of Washington, is a friend of the Shakespearean scholar and director, B. Iden Payne, who is directing "Cymbeline" this summer for the Oregon festival. The Tobins, their guests, and Mr. Payne had dinner together Sunday at Mon Desir.

Dr. Willis, who has seen Shakespearean productions at Stratford-upon-Avon in England and at Stratford, Ontario, Canada, praised the Oregon productions and stated they compared very favorably with those in England and Canada. Both visitors commented on the beauty of the setting of the Ashland theater. Dr. Willis was in Ashland last summer to attend play rehearsals.

Dr. Willis was en route to the east coast to visit a friend, Miss Lucy Barton, who is chief costumier for one of the summer theaters on Cape Cod.

Mrs. Tobin, head of the English department for Medford High school, returned recently from New York where she spent a few weeks doing research on curriculum and attending a seminar on communications at Columbia university. Mrs. Tobin also saw a number of New York plays while away. She was a guest of her sister who lives on Long Island.

Two Leave

Jack Moran Jr., who was official photographer for the Oregon Shakespearean festival this season, left Sunday for San Francisco where he makes his home. While working with the festival Mr. Moran was a guest of his parents, Mr. and Mrs. Jack Moran, Jackson street.

Bob Arbuckle, also formerly of Medford and now of San Francisco, returned south with Mr. Moran after a brief visit here to attend the festival.

Medical Profession Seeks Recognition for Iron Lung

Memphis, Tenn. — U.P. — The medical profession here has dug deep into past records and is ready to support a 78-year-old semi-retired physician's claim that he's really the man behind the first iron lung.

Dr. Charles Morgan Hammond is on the sidelines looking on, while the Memphis and Shelby County Medical Society is taking the initiative to get the iron lung credit for Hammond. Hammond isn't seeking recognition.

"All I want to do is to help people," the elderly doctor said. Hammond said he has "a couple of ideas, for an upright respirator for heart patients."

Doctors here support Hammond's claim that he invented and patented the world's first iron lung.

Hammond was never able to get his invention into production because of limited finances. He failed to renew his original patent when it expired, and other respirators began appearing on the market.

Some of the modern machines use centrifugal pumps to regulate air pressure; others use the bellows principle of Hammond's first simple apparatus.

Finally Hammond's name dropped out of the picture, his original work forgotten. Until now, when younger doctors hope to get him recognition by the American Medical Association's library, the surgeon general's library and Encyclopedia Britannica.

Dr. Henry Gotten heads a committee to support Hammond's case. It was pointed out that most authorities and encyclopedias gave credit to Philip Drinker and Louis A. Shaw of the Harvard School of Public Health in Boston, who developed an iron lung in 1928.

Gotten said that records in the U. S. Patent Office certify that Hammond actually originated the machine years earlier. Records show that Hammond filed his patent—No. 1,087,942—was granted Feb. 24, 1914, Gotten explained.

The patent expired 13 years later when Hammond failed to renew it. The Drinker machine was patented in 1931.

The white-haired Hammond, a graduate of the old Memphis Medical college, had hung out his doctor's shingle on a huge cotton plantation below West Memphis, Ark.

He suffered an attack of pleurisy while making calls on horseback while bedridden, Hammond thought how he might breathe easier if he could reduce the atmospheric pressure over his inflamed chest.

Hammond figured that a machine that could alternately rarefy and condense the air over the chest would, in effect, breathe for the patient, and give his lungs a rest.

Diminishing the pressure would force the lungs to take in air, increasing it would force air out, thus accomplishing the breathing process with a minimum of effort.

Hammond made preliminary sketches and got a carpenter-mechanic to work on building the

Meaty Rabbit
Bologna strips and chopped ripe olives give extra color and flavor to this new jiffy rabbit. Combine 1 can condensed cream of mushroom soup with a quarter pound of cubed American cheese and ½ teaspoon prepared mustard. Heat till mixture is smooth. Add ¾ pound of bologna cut into thin strips and ½ cup chopped black olives. Heat thoroughly and serve over toast points. Serves 4.

INTERNATIONAL SET—They're wearing lavish cottons on the Riviera—as witness these paisley printed retonne pants and tailored poplin blouse by "Chemister Florence."

Rust stains in bathtub or sink often will come off when rubbed with kerosene. Several applications may be necessary, says the Alabama Extension Service. To whiten, white porcelain fixtures which have yellowed make a strong solution of laundry bleach and water and let stand in tub or basin for an hour or so.

I had expected." In 1909 Hammond completed his first motor-driven respirator incorporating the basic principles which he later patented. Three years later the machine passed its first clinical test when a despondent man who had taken morphine and was near death, was placed in the respirator. Five hours later, Hammond said, the man was out of danger.

Hammond has yellowed newspaper clippings telling how his respirator breathed life into persons dying of pneumonia, heat prostration, gas and ether narcosis, infantile paralysis and other conditions paralyzing breathing.

Hammond built his first cabinet-type respirator in 1919, a machine which covered the entire torso and extremities, similar to respirators in use today.

His wife, a former nurse was his technical assistant. Years later, Hammond developed a special attachment which rarefies the air over the head to counterbalance sudden alteration of air over the torso, this produced more normal respiration.

New York's Newest Skyscraper

... will feature nearly five miles of broadloom Gulistan Carpet. Gray pepper and salt design is being installed in offices of the Socony Mobil Oil Company, Inc. in the world's largest stainless steel skyscraper.
