### Archery Shop Being Opened

By MRS. SAM ELLIOTT  
Gold Hill—Neil Tarbell of Ontario, Calif., and Wayne Brandon and Bud Ingram have taken over the empty building next to the OK Pastime as a custom manufacturing center for hand-made bows for archery customers. It will be known as the Tarbell Custom Bow.

Five machine tools and considerable material have been brought in so they are ready to go to work. The young men have many orders yet to be filled from their business in California. The bows use black walnut, which is supplied by Joe Williamson of the Old Stage rd., with maple for the limb and a covering of fiber glass which comes from Los Angeles. The strings are made of dacron. They are made in eight different lengths.

Brandon has killed the largest black tail deer ever killed in the U.S. with his own bow and arrow, in California. There is to be an archery tournament in Eugene on Aug. 18 and 19 in which the three will participate. Williamson is a three-time champion.
