Students will be taught how to use the telephone properly, to answer calls, to use the directory, to make long distance calls, and to develop telephone personality, Vinckel said.

Businesses, according to Vinckel, often state that high school business graduates are lacking in this phase of business training.

Telephone company plans for this equipment include use at all interested schools in the county. Talent High has scheduled the control unit for three weeks. Talent school officials started negotiations over a year ago to bring the equipment to Jackson county.
