

Oregonians Have Seven State Laws to Pass Upon at Next Week's Election

Stevenson Says Israel Invasion Gives Lie To Claim by Republicans

Boston—(U.P.)—Adlai E. Stevenson charged Monday night that the Israeli invasion of Egypt gives the lie to the Eisenhower administration's claims that "all is well in the world."

He declared the administration has not told the "whole truth" in a speech before a crowd of 9,000 in the Mechanic's building.

Stevenson headed for Maryland, New Jersey and Pennsylvania with his campaign caravan today.

The Democratic presidential candidate said the developments in the Middle East were "ominous and confusing."

Less Than Truth

"The government in Washington has been continuously tell-

ing us that all is well in the world, that there is peace, that there is—as the President announced a few days ago—good news from the Middle East," Stevenson said.

Stevenson said report of the Israeli invasion of Egypt "confirms" that these reassurances "have been tragically less than the truth."

"We've got to be trusted," he said. "We've got to be ready to meet problems, to face them squarely and make the right decisions."

"And how can we, unless we know the facts, unless we know the whole truth about the world in which we live?" he asked.

Stevenson said we have been "patted on the head and told that everything's all right" under the Eisenhower administration.

"This is dangerous—dangerous to our very survival in a troubled world," he said.

Fails as Leader
Stevenson spoke for 30 minutes over a nationwide television hookup and then talked off-the-cuff to the crowd for about five minutes.

He said President Eisenhower "seems to have climbed down from his pedestal and become a politician."

"As a campaigning politician there is none better," Stevenson said. "It is as a performing politician, as a President who knows how to control his own party, who knows how to grasp the reins of government, that I believe he fails."

Stevenson's schedule today was to open with a Baltimore speech at mid-day followed by a talk at Camden, N.J., and two in Philadelphia. His major address will be delivered on the University of Pennsylvania campus at Philadelphia tonight.

Measure No. 1, Tax Authority, Most Controversial

Portland—(U.P.)—Oregonians—who originated the idea that voters can be legislators—have seven state laws to pass on at next week's election. Five of these pieces of legislation were referred to the people for action by the Legislature; one is a referendum ordered by a public petition, and the seventh was proposed by a petition circulated at the people's own initiative.

Of the seven, none has created quite so much controversy as Ballot Measure No. 1. None of the seven is quite so complicated as that one nor would any of the others have such a far-reaching effect on Oregon's government.

On the surface, and judging from the ballot title, it sounds simple enough. It would merely authorize state tax laws to take effect immediately.

As things stand now, no tax law takes effect immediately. It sits idle for 90 days without force or effect after the Legislature has adjourned. During that time, the voters have a chance to challenge the law by circulating petitions against it. If that happens, and if enough signatures are obtained, the law is suspended until it can go on the ballot at the next general election. Then it can be finally approved or rejected. That very thing happened with the cigarette tax measure that is on this year's ballot.

Ballot Measure No. 1 would change all that by amending Oregon's constitution to allow the Legislature to attach an emergency clause to tax bills. Legislation bearing that clause goes into effect as soon as the governor signs it.

Opponents say it would take control of tax policy out of the hands of the voters and that it is the back door approach to a sales tax. They argue that voters of Oregon have proved better judges of money matters than the legislators of many states.

Private Atomic Reactor Completed

Columbus, Ohio—(U.P.)—Completion of the nation's first privately owned atomic research center was revealed here today by the Battelle Memorial Institute.

The center includes a \$770,000 nuclear reactor which uses solid uranium-235 as fuel. Radiation laboratories were finished at the center just a year ago. In February, Battelle completed another laboratory for reactor development.

Battelle scientists said the reactor will be operated 24 hours a day, six days a week. It was designed by the institute's own physicists and engineered and built by the American Machine and Foundry Co.

Examinations Announced For Federal Service

A written examination for college seniors and graduates who wish to enter federal service through its federal service entrance examination will be held Jan. 12, 1957, if applications are filed prior to Dec. 27, the civil service commission has announced.

Additional information and application forms may be obtained from the civil service commission in the post office building here.

Every organized sportsmen's and conservation group in the state. They say it will save salmon for sportsmen and for tourists and they argue that commercial fishing in the affected streams is not important anyway. They claim that no salmon netter south of the Columbia makes his full living from fishing and that it is a part-time occupation of little significance. They assert, further, that the bill would mean more salmon for everyone by permitting a larger escapement to the sea where commercial trollers could catch them.

The commercial people say those sports arguments are based on emotion rather than fact and they plead with voters to leave fishery regulation up to the State Fish Commission.

On these and other pieces of legislation, the voters-turned-lawmakers will have the final word next Tuesday.

Bride Found Dead From Exposure

Jackson, Wyo.—(U.P.)—Twenty-three-year-old Elizabeth Pallman of Columbus, Ohio, a bride of 10 days, was found dead from exposure Monday in snow-covered Teton National forest.

Her husband, John Pallman, was being treated for shock and frostbite at a Jackson hospital.

They left Columbus 10 days ago after their marriage, to honeymoon in the Jackson Hole area. They first got lost last Wednesday night in a snow-storm.

Pallman said they got separated by accident on Saturday, while trying to find their way back to their car.

Bethlehem Steel Negotiations Moved

New York—(U.P.)—Negotiators representing Bethlehem Steel Co. and the Industrial Union of Marine and Shipbuilding Workers of America moved contract meetings today to Bethlehem's offices.

Federal Mediation Commissioner Sidney S. Sheiner reported "progress is being made" toward an agreement on a contract to govern 14,000 workers in eight Eastern Seaboard shipyards. He said he would continue to mediate the dispute.

Rubenstein, economist; V. L. Kudryavtsev, political writer, and Leonid Solovet, trade unions official. (International Soundphoto)

Expulsion Demanded For Soviet UN Member

United Nations, N.Y.—(U.P.)—The United States demanded Monday the expulsion of a member of the Soviet United Nations delegation for his role in helping a turnabout Russian refugee smuggle his American daughter to Europe.

The demand was made in a note to Arkady A. Sobolev, Soviet permanent delegate, from U.S. Ambassador Henry Cabot Lodge Jr.

Tanya is the 2½-year old daughter of Alexei Chwastov. Immigration officers tried to prevent her departure aboard the liner Queen Mary Oct. 3 on the grounds that Tanya is a U.S. citizen and was leaving without an American passport.

Both Tanya and her father are now in London. They were prevented from sailing to Russia Oct. 12 under a British court order obtained by her mother, Mrs. George Diaczok, of Detroit. Mich. Mrs. Diaczok charged that Tanya was kidnapped.

SCRAP LEADS TO SCRAPE

Cleveland—(U.P.)—Robert E. Crawford never lets legal proceedings stand in the way of business. Monday—scheduled to present his defense in his trial for a grocery robbery—he was arrested for hauling three tons of material from a transit system yard to sell as scrap.

Norman Thomas Calls For Bomb Test End

Princeton, N.J.—(U.P.)—Norman Thomas, six-time candidate for the presidency on the Socialist ticket, Monday called for an end to H-bomb tests.

Thomas, who graduated from Princeton University in 1905, said that an end to H-bomb testing is "a necessary step toward disarmament."

"I don't think people are cognizant of the fact that if we don't stop, other nations are going to join in testing," Thomas told a group of 200 townspeople here.

He said that our form of government "paid little heed" to what "the majority" of scientists believe.

EXPERIENCE IS ALWAYS THE BEST

RE-ELECT L. G. "Shy" Morthland—Keep Him On the Job!

"Shy" has no interests to serve but the interests of all Jackson County citizens, and he serves county wide! As the records will show, his work on the Court has been most productive. You can profit by the eight years experience, training, and proven ability "Shy" has gained as County Commissioner. Protect your interest in efficient county operation by re-electing L. G. "Shy" Morthland as your county commissioner.

NO MORE OF THIS...

New Johns-Manville Seal-O-Matic Asphalt Shingles

They hold tight in high winds because they are Self-Sealing

Here's the secret: The sun's heat seals the tabs automatically because of a special petroleum resin cement strip on the underside.

The butt edges are sealed down by the sun's heat.

No fear of damage in high wind... wind can't get under the shingles.

Traditional shingle design.

This development of Johns-Manville research is the most important contribution to roofs in the last 20 years. Seal-O-Matics seal themselves down—grip the shingles underneath with bulldog tenacity. Cost but little more than ordinary shingles. Your choice of many colors and blends. Come in and see them!
