84	Sterling*	Old West Place, Applegate rd.

Arson Charge Filed Against Yakima Man

Yakima—(U.P.)—Second degree arson charges were filed in Superior Court here yesterday against David Kardack, 22, Yakima, in connection with the burning of a trailer house belonging to the late Walter S. Freeborn, Great Falls, Mont. Eugene Hatch, 20, Yakima, has admitted slaying Freeborn during an argument in the trailer house at The Dalles, Ore., Oct. 14. Hatch told police he enticed Kardack to burn the trailer to destroy evidence of the slaying.

Hatch was arrested here last week and was returned to The Dalles to face first degree murder charges.

Grant County Area Searched for Airplane

Baker—(U.P.)—A small search was still under way in the southern Grant county area near Seneca today but most sources discounted reports that a plane had gone down in the area yesterday.

Officials of the Ground Observer Corps and the Air Force radar station at Burns said there apparently had been a low-flying plane in the area yesterday but indications were that it had made its way on and there had been no crash.

Employees of the Hines Lumber Company at Seneca had reported seeing the plane and some believed it crashed.

New Study Proposed For Bridge at Astoria

Olympia—(U.P.)—A new study to determine the financial feasibility of the proposed Astoria bridge was recommended yesterday by Washington and Oregon Highways department officials.

At a conference here the officials said that if the span should not be feasible at the Astoria site, a study should be made to determine whether it can be financed at another site farther upstream.

As now proposed, the bridge would be built across the Columbia river between Astoria, Ore., and Megler, Wash.

DELUXE GENERAL ELECTRIC

DRYER

with Automatic Control

\$199⁹⁵
NOW ONLY

WAS \$229.95

EASY TERMS!

With this new G-E Dryer, you can dry clothes automatically—and know that they will come out fluffy dry and sweet smelling! No more sun-faded or grime-splashed clothes to worry about—no more "clothes-pin ears" or line-set wrinkles!

ELIMINATES DRYING GUESSWORK!

Automatically adjusts the drying time and temperature to the individual load—one control—one simple setting!

D—for delicate silks and synthetic fabrics

N—for cottons and linens

H—for hard-to-dry loads (bedspreads, etc.)

G-E DRYERS START AT \$133.00

Finish for Houses With Cedar, Redwood Developed

Madison, Wis.—(U.P.)—A chemist at the U. S. Forest Products Laboratory here has developed a finish for houses with red cedar and redwood siding.

D. F. Laughman, chemist in charge of the U. S. Forest Service's laboratory research in painting and finishing, said:

"We have studied natural finishes for more than 10 years. Practically all such finishes available to house owners are so short-lived that they must be renewed each year, or at the best every other year.

Response To Demand

"The laboratory finish was developed in response to a mounting demand from house owners for a more durable and reliable natural finish. Test results so far indicate that the Forest Products Laboratory's natural finish should last four years or more—the average life of a good paint job—before needing renewal. The finish is being tested on houses in various parts of the United States."

The formula for a five-gallon batch of cedar-colored natural finish:

Raw linseed oil, three gallons; mineral spirits or turpentine, one gallon; burnt sienna color-in-oil, one pint; raw umber color-in-oil, one pint; paraffin wax, one pound; pentachlorophenol concentrate 10-1, one-half gallon, and zinc stearate, two ounces.

How To Prepare

For light redwood use 1 1/3 pints of burnt sienna and two-thirds of a pint of raw umber. For dark redwood, use one-half pint each of burnt sienna and raw umber plus one pint of pure red iron oxide color-in-oil. By

varying the amounts of the burnt sienna and raw umber colors-in-oil other shades can be developed.

To prepare the finish, pour the gallon of mineral spirits into a container. Put the paraffin and zinc stearate in a pan and heat over a flame, stir until a uniform mixture results. Pour the mixture into the mineral spirits, stirring vigorously while it is being added, but there must not be an open flame in the room at the time.

Follow With Linseed Oil

When the mineral spirits solution has cooled to room temperature, add the half gallon of pentachlorophenol concentrate and follow with the linseed oil. Then stir in the colors-in-oil, a little at a time, until the mixture is uniform. It is then ready for use.

One coat should be applied to smooth new wood. A gallon will cover 400 to 500 square feet. Two applications are recommended for surfaces on which a gallon will cover 200 to 250 square feet.

The coast guard each spring blazes a trail through the ice fields of the Great Lakes to open a route for the all-important carrier commerce.
