

HUNGARIAN SEATS EMPTY—Hungary's seats remain empty in UN General Assembly chamber before start of second emergency session in New York. The Assembly wound up first night session by voting 50-8 in favor of an American proposal demanding that Soviet Union withdraw their troops from Hungary.

Robert Holmes, Governor-Elect, Favorably Known

By UNITED PRESS
Who is Robert Holmes? Many people around Oregon are asking that question today although several hundred thousand voted for him Tuesday to make him the state's governor-elect.

Bob Holmes is well and favorably known to his colleagues in the Oregon Legislature but, before 1956, he was virtually unknown to the mass of voters in the state.

Radio Executive

By profession, the new governor is a radio station executive. A resident of Gearhart, he manages Radio Station KAST in Astoria. He is 47 years old, a native of New York, married to the former Marie Hoy of Portland and is the father of two sons.

Holmes joined the staff at KAST some 15 years ago. Before that he worked for Portland newspapers and for Bioproducts, Inc., at Astoria. He finished high school at Rochester, N. Y., and also attended University of Oregon. He is a member of Delta Tau Delta and Alpha Delta Sigma.

Worked for Education

At Salem during his four sessions in the Legislature as a state senator, Holmes became best known for his work on the education committee where he served as chairman in 1953. In 1955, Elmo Smith, then president of the Senate, declined to re-appoint Holmes to the chairmanship of the education committee and a friction developed between the two that culminated in Holmes' defeat of Smith in Tuesday's election.

In the 1955 Legislature Holmes' hardest work and longest hours were put in on the taxation committee where he fought tenaciously against proponents of a state retail sales tax.

Democrats also won in Arizona, Arkansas, Colorado, Florida, Texas, Missouri and North Carolina. Republicans also won in Delaware, Indiana, Montana, Nebraska, New Hampshire, North Dakota, South Dakota, Utah, Vermont and Wisconsin.

Inexpensive Method Found To Resurface Certain Roads

Tegucigalpa, Honduras—(U.P.)—An experiment successfully conducted here by U.S. technicians appears to point the way to an inexpensive method of resurfacing roads in areas where lime and clay are readily available.

The method is already being used in Texas, Illinois and other states of the Union.

The experiment was conducted by the consulting firm Arthur D. Little & Co., of Cambridge, Mass., at the request of the Honduran government.

In a quarter of a mile stretch of the highway which leads from Tegucigalpa to the picturesque Valle de Angeles, the technicians experimented with a road surfacing mixture of lime and clay, under controlled conditions.

The experiment appears to have demonstrated that lime, either quick or slaked (hydrated), when mixed with clay produces a hard material resembling cement.

It is believed that since clay is a large component of the average cement, lime dissolved in water surrounds the clay particles which are in colloidal suspension, thus binding the whole mass in a cementation action.

Building Blocks

The highway stretch where the experiment was conducted has been under close observation for some time now and despite the prevailing rainy season it has remained in excellent condition, necessitating no asphalt surfacing.

The government of Panama recently sent engineers here to study the Honduran experiment and inquiries have come also from firms and individuals throughout Central and South America regarding the outcome of this low-cost process which, if widely exploited, could revolutionize road-building in many places.

Lime-stabilized building blocks and hard-packed floors will soon be used in Honduras in low-cost housing units.

In the experience of the testing laboratory of the Honduran highway department, the higher the clay content of the soil, the better the lime-stabilization process works.

Research Work Required
It is emphasized, however, that in each case, laboratory and research work is required to determine the varying conditions as to sand, silt and clay content of the soil before the lime stabilization process can be applied.

In terrain with a high clay content, such as that around Tegucigalpa, the usual process is to loosen and homogenize the ground over the whole surface of the road, so that the lime can be mixed in under controlled conditions, as to amount, moisture content, thoroughness of dispersion, etc. in order to assure complete distribution of colloidal particles of clay.

BEAUTY TREATMENT

West Springfield, Mass.—(U.P.) An exhibitor at the Eastern States Exposition disclosed that the wavy hair on his Aberdeen Black Angus cattle wasn't natural. Ralph Lyndman of Suffern, N.Y., explained it was curried by using a special wave set dried by fans.

Carpets Keep New Look

With proper care wall to wall carpeting will retain the new look.

Correct cleaning methods have seemingly been a mystery and controversial even to carpet manufacturers. After much research a product is on the market that cleans and fluffs up beat down carpet paths plus removal of spots thereby maintaining the new look. The textile engineer of a large carpet mills says—"It's the best we've found."

The product is Blue Lustre. It is easily applied with a long handle brush. One half gallon of Blue Lustre concentrate cleans three 9 x 12 rugs.

ONE FOR THE DEMOCRATS—Adlai Stevenson, ballot in hand, has a big smile for the cameraman as he leaves the voting booth at Haliday, Ill., after casting his vote.

Ohio Population Set at 9,006,000

Columbus, O.—(U.P.)—Ohio's population now stands at 9,006,000.

A special census conducted for the State Liquor Department showed a population gain of 1,059,373 in the past six years.

The count, first since the federal census in 1950, was taken after the Ohio Supreme Court ruled liquor permits must be issued on the basis of current population figures. The department had issued a "freeze" in 1949 and held the number of permits at that population level.

The special census, costing \$30,000, said 285,934 persons had moved into Ohio from other states during the six-year period. They accounted for 27 per cent of the total increase.

The natural increase was 773,439. This was the number of births over deaths.

Dr. Alfred N. Watson, former U. S. Census Bureau statistician

who conducted the study, said Cleveland still is Ohio's largest city. It showed a population of 933,827. Cincinnati has 531,220, Columbus 435,027 and Toledo 328,778.

Democrats, Republicans Evenly Divided on Gubernatorial Races

Washington—(U.P.)—Republicans and Democrats finished with an even number of victories today in 29 of Tuesday's 29 gubernatorial elections.

Balloting was so close in the 29th contest that absentee votes will determine the outcome.

Although each party captured 14 of the state houses, the Democrats scored a net gain of two. Their candidates ousted Republican

governors in five states while Republicans upset Democratic control in only three.

Democrats Hold Majority

Counting holdovers and Gov. Edmund S. Muskie of Maine, who was reelected in September, the Democrats are assured of control in a majority of state capitals. They went into Tuesday's election with a 27-21 edge. The new lineup will be 28 Democrats and 19 Republicans with one election—Rhode Island—still up in the air.

In Rhode Island, Democratic incumbent Dennis J. Roberts held a lead of less than 200 votes over Christopher Del Sesto with all precincts in. The outcome will hinge on 11,000 absentee ballots that will be counted Dec. 5.

Democrats captured the governorships in the long time Republican strongholds of Oregon, Kansas and Iowa. They also ousted Republicans in Washington and Massachusetts.

Upset in West Virginia
Republicans won a major upset in normally Democratic West Virginia with the election of 34-year-old Cecil Underwood. They also won control from Democrats in Ohio and New Mexico.

In Oregon, Robert D. Holmes became the first Democrat to win the governorship since 1934 by defeating incumbent Gov. Elmo E. Smith. The Democratic gubernatorial victories in Kansas and Iowa were the first in two decades.

Republican Gov. William G. Stratton of Illinois won an uphill battle for reelection with an outpouring of downstate votes that offset the lead piled up by Democrat Richard B. Austin in Cook county which includes Chi-

Yield: 12 biscuits
1 1/2 cups sifted all-purpose flour
2 1/2 teaspoons Clabber Girl Baking Powder
1/4 teaspoon salt
1/2 cup yellow corn meal
1/2 cup milk

Sift together flour, Baking Powder, and salt into a mixing bowl. Blend in corn meal. Cut in shortening until mixture resembles coarse crumbs. Add milk all at once. Stir lightly with a fork, just enough to moisten all the flour. Knead gently about 1/2 minute on lightly floured board. Roll dough 1/4 inch thick. Cut with 2-inch cutter. Place on lightly greased baking sheet. Bake in a 450° F (very hot) oven 12 to 15 minutes.
