BRITAIN ENDS WAR—A British paratrooper takes a cat-nap inside plane on way to drop troops near Port Said, Egypt. As fighting raged around the Port Said area, Britain officially informed the United Nations that Allied forces were ending hostilities in the Middle East.

Opportunities Discussed For Girls in Dental Work

There are abundant opportunities for girls in the dental occupation, Mrs. Frances Dempster, dental assistant, told a group of girls at Medford High school Thursday.

She said allied vocations in this field are dental technicians, dental hygienists and dental assistants.

The dental laboratory technician makes prosthetics under the direction of a dentist. The hygienist removes calculus, cleans teeth and teaches oral hygiene.

Duties Listed

The dental assistant's duties are to assist the dentist in laboratory work, x-ray teeth, sterilize instruments, clean laboratory equipment, make patients comfortable, make appointments and do bookkeeping.

Mrs. Dempster pointed out that the training for the dental laboratory technician is received through "on-the-job" experience along with evening related-training courses. The dental hygienist's training consists of one to two years of college work.

She said one year of high school chemistry was a prerequisite for this curriculum. Some of the approved schools on the west coast are City College of San Francisco, Los Angeles City college, Pasadena City Schools, Long Beach City

college and the University of Oregon dental schools which provides "night courses" for dental assistants.

Completes Training

To become a certified dental assistant, one obtains her on-the-job training from the dentist and completes the 105-hour dental assistant course prescribed by the American Dental Assistants association.

High school courses recommended by Mrs. Dempster were geometry, English, bookkeeping, typing, chemistry, psychology, and sociology.

Mrs. Dempster announced that there will be a dental assistants course offered at the beginning of the year and that high school girls and women who are not presently working as assistants may enroll in the class at a minimum tuition fee.

However, in order to be eligible for the "certification examination," it is necessary to have work-experience, be a member of the national organization and successfully complete the examination. Any one interested may write to Mrs. Frances Dempster, 1025 South Holly st., Medford.

Bell System's New Show Is Scheduled

The first presentation of Bell Telephone system's new television science series, "Our Mr. Sun," will be presented over station KPBS-TV at 7 p.m. Monday, Nov. 19.

The program will be seen over a special network on more than 150 stations in United States and Canada. The show is produced and directed by Frank Capra.

Two Oregon scientists and their invention, the Bell Solar battery, are shown in part of the program. They are Gerald Pearson and Daryl Chapin, graduates of Willamette university.

The show is the story of the sun, how it was born, what makes it shine, how it is the original source of all power, and how it affects all living things.

Wednesday, Nov. 14, the color film will be shown at a preview in the Medford High school auditorium for school administrators and science teachers. Following the television presentation, the film will be available for special interest groups.

Who Are THE LUTHERANS?

Early in the 16th century, there was only one Protestant in the world. He was Martin Luther—a Roman Catholic priest, scholar and theologian.

Through years of inner agony—long days and nights of Bible study—pensive comparison of the theologians—Luther had come face-to-face with the painful fact 13 centuries had gradually changed the historical church into something radically different from that which had been founded when God came to earth and died on a hill called Calvary.

Luther's open "protest" began when he nailed the Ninety-Five Theses to the church door in the little university town of Wittenberg, Germany, on October 31, 1517.

Less than 50 years later, the Lutheran rediscovery of New Testament Christianity had touched the whole western world and was flourishing across most of northern Europe.

Today, it is the faith of 70 to 90 million people. No one knows exactly how many they number—because once again millions of Lutherans are martyrs, this time behind the Iron Curtain.

The "Mother Church of Protestantism" is by far the largest of all Protestant churches. She includes more than one-third of all the Protestants in the world. You, too, may wish to learn more of her faith and life.

LUTHERAN EVANGELISM MISSION

You are cordially invited to attend the Lutheran Evangelism Mission at ZION LUTHERAN CHURCH 4th and Oakdale, at which "The Life in Christ" will be explained by The Reverend Robert S. Rameis SUNDAY, NOV. 11 - 11 a.m. and 8 p.m. and Monday through Thursday at 8 p.m.
