IT'S HERE!

THE NEW FORD two-way PLOW

- Throw all furrows in same direction
- Eliminate dead furrows... back ridges

Fully tractor mounted, this new two-way two-furrow moldboard plow is just the thing for convenient operation—effective, low-cost performance. Bottoms raise, reverse and lower quickly and easily with Ford tractor's hydraulic control system... and the plow is convenient to transport, maneuver and store.

By throwing all furrows the same direction you can eliminate dead furrows and ridges for smoother irrigated fields. Or you can throw all furrows uphill on hillsides to slow water run-off and erosion. Also excellent for contour and strip farming and for terrace maintenance.
