Meteorologist Describes Fog-Creating Conditions

Bob Church, meteorologist of the local weather bureau, discussed the problems and causes of the recent fog in the Medford vicinity at the noon luncheon of the Jackson County Chamber of Commerce Roundtable at the Jackson hotel yesterday.

As a result of the November fog, Church said, there were 17 days at the Medford airport when visibility was reduced to a quarter of a mile or less.

Explaining the extended presence of fog in the valley this year, he said that storms coming

from the Pacific have not been able to penetrate the local fog blankets. The result is that storms circle northward around the fog and terminate in the middle west, he said.

Church pointed out that it takes a great deal of turbulence in the atmosphere to mix the warm higher air with the lower cold. This drives out the fog, he said.

The meteorologist added there is presently a storm front moving southward from northern Oregon. But it may not have the power to drive out fog once it reaches the valley, he said.

Florence Woman Dies In Highway Accident

Florence, Ore. — (UP) — Mrs. Edna C. Ford, 71, was injured fatally shortly before Saturday night when a car driven by her husband, James Ford, 78, tried to turn into the driveway of their home 1/2 mile south of Florence on Highway 101.

Their car stopped in the wrong lane and was hit by a pickup truck driven by John Arthur Gaham of Coos Bay.

Quantity of Pills Said Taken by Dorsey

Hartford, Conn. — (UP) — A toxicologist reported Monday that band leader Tommy Dorsey took enough sleeping pills to "knock him unconscious" before he choked to death on food particles a week ago.

Dr. Abraham Stolman, chief toxicologist of the state Health Department, declined to say whether the band leader had swallowed a sufficient quantity of nembutal to kill him. "That's for the coroner to decide," he said.

The report was turned over to Coroner Edgar W. Krentzman who previously said Dorsey's death in his Greenwich home was accidental. The coroner declined comment pending study of the report.

It showed that Dorsey had 2.8 milligrams of the barbiturate in his blood which Stolman said was "enough to knock him out but not enough to kill him."
