The Low Cost Way to Sell

Federal Road Costs Mount; Many Problems Yet To Be Ironed Out Before Job Started

Editor's note: This is the third and last of a series on the federal highway building program.

By ROBERT E. JACKSON
United Press Correspondent

New York — (U.P.) — The cost of the federal super-highway program has shot up a billion dollars since President Eisenhower signed the bill last June.

A nationwide steel shortage has hit the 13-year-road-building project in its first months. Construction costs are rising. There is a shortage of engineers.

The problem of what to do about state toll roads slated for inclusion in the free-of-charge highway network became so thorny it had to be postponed.

A nationwide scramble is on to join the gravy train. Six state capitals were left off the network — Annapolis, Md., Dover, Del., Pierre, S. D., Raleigh, N. C., Jefferson City, Mo., and Carson City, Nev. The project is tailored for national rather than state needs, but scores of towns are irked.

Some Yet To Be Charted

One thousand miles of the 41,000 mile network remain to be charted. If all the bids for those last miles were accepted, the system would have to be extended 12,000 miles. New York State, which contributed its completed thruway to the system, wants half of the final 1,000.

Critics warn that the rights-of-way are insufficient to keep away the ubiquitous billboards. Some doubt the wisdom of allowing every town and village by-passed or cut by the system to delay the project with public hearing. Others question the willingness of the American driver, a creature of habit, to turn off his main highways for gas and food.

Taxpayer Hit Again?

Will the taxpayer stick it out? He now averages $91 a year in taxes on his car. Although the network will provide him savings in gas, oil and time, it will add about $8 a year, or almost one per cent, to his tax load.

Restaurants and service stations left off the system will scream. Apartment houses and businesses must be knocked down and moved. Farmers are already haggling over prices and property. The federal government had to set up a special fund to help states buy property before values zoom.

States must maintain the system.

Despite its great promise, this project is not going to be as easy as rolling off an embankment.

But Federal Highway Administrator Bertram D. Tallamy and other officials take a calm, optimistic view.

The financial schedule is "tough," the shortage of engineers a problem, Tallamy told United Press, but he added:

"It can be accomplished."

Tallamy and others say that the 3.8 per cent increase in building costs and materials which added a billion dollars to the bill in the first five months could be wiped out over a 13-year-period. And new techniques already have cut in half man-hours per job in building.

Aerial Surveys

To atone for the engineering shortage, the planning state will be cut, more aerial surveys will be used. Radio telephones and electronic computers will free engineers from desks. Technicians will be trained for "semi-professional" work.

Despite shortages, Tallamy believes manufacturers who must come up with 49 million tons of steel and a billion barrels of cement will "find a way." They have a guaranteed market for 13 years.

To date 36 states have signed 125 projects costing $157 million. Spending will average about $3 billion in the 1960s, may hit a peak on all national road improvement of $8 billion—a lot of money but only half of what we are spending this year on the Air Force.

It took the Romans 500 years to build their 50,000 single lane miles of cobblestone. This asphalt, cement complex of 150,000 lane miles is slated for 1970-75. In these fast-changing times, will it be outdated then?

Tallamy says no. "It is," he said, "undoubtedly suited for automation type travel. It is suited in every respect for the traffic for see[illegible]."

Warrant Issued For Ann Sheridan

Mexico City — (U.P.) — The district attorney's office issued a warrant for the arrest of actress Ann Sheridan Wednesday in connection with an adultery charge lodged against her by the estranged wife of Mexican actor Rodolfo Acosta.

In formal charges filed more than a month ago, Jeanine Cohen Acosta asserted her husband and Miss Sheridan shared a "love nest" in a swank Mexico City apartment building.

The district attorney's office said the warrant was issued because Miss Sheridan failed to answer several subpoenas requesting her to appear to testify on the charge.

Evidence of Arson Found at Portland

Portland—(U.P.)—Fire Marshal Dale Gilman said today he had uncovered "definite evidence of arson" in a $30,000 blaze which destroyed two stores in a market building in downtown Portland Monday night.

Gilman said an earlier report that the fire had smoldered for several hours was eliminated. "We know the fire didn't smolder—it probably burned about 15 or 20 minutes before it was discovered," he said.

Youth Held Entitled To Father's Insurance

Portland —(U.P.)— A Federal Court jury ruled yesterday that a 19-year-old youth who was acquitted of a manslaughter charge in connection with his father's death was entitled to collect life insurance policies totaling $10,000 on the life of the father.

The jury made the ruling for Harvey Biswell, who was 16 when his father was killed with a baseball bat at Burns, Ore., about three years ago.

His grandmother, Mrs. Lissie Grindstaff Biswell of Nampa, Ida., claimed she, as contingent beneficiary, was entitled to the insurance.

Steamer in Portland Drydock for Repair

Portland — (U.P.) — The stern-wheel steamer Henderson, damaged off Astoria last Sunday by heavy swells, went into drydock today to see if she can be economically repaired.

The Henderson was damaged when she and three tugs were trying to move the Liberty vessel John M. Schofield from the Astoria reserve anchorage to Longview to discharge 6000 tons of surplus grain.

She is the last wooden stern-wheeler in active service on the Columbia river.

MEN!
YOUR LONG-TERM JOB
IS WAITING RIGHT NOW... AT BOEING

IMMEDIATE OPENINGS FOR:
- SEMI-SKILLED MECHANICS
- MACHINISTS
- TOOL & DIE MAKERS
- INSPECTORS
- ELECTRONIC TECHNICIANS
- DIE FINISHERS
- PATTERN MAKERS
- TRAINER MECHANICS
- SHEET METAL MECHANICS

These are not "just jobs." They are opportunities for you to work on "years ahead" production projects, including commercial and military jet aircraft and guided missiles. It is important work—interesting work. And it could mean the start of a new career for you!

And there'll be a plus in your paycheck at Boeing. You will live and work in the heart of the Puget Sound Evergreen playland . . . cool summers, winters so mild you'll play golf in December . . . a year 'round sportsman's heaven with salt water lakes, mountains, virgin forests at your back door. Metropolitan Seattle . . . city of fine stores, outstanding schools . . . city of lovely homes and truly western hospitality.

Openings available at all experience levels. If you are skilled or semi-skilled in virtually any mechanical or electrical field you may qualify for one of these openings.

Positions offer good starting wages, excellent working conditions, paid vacations and holidays, variety of employee-managed sport and social activities.

TRAINING PROGRAM

"On-the-job" instruction available to selected applicants in tooling and electronic fields. Assignment to these programs would mean an opportunity for you to earn while you learn a skill and to profit from this skill for many years. "Off-hour" vocational training in wide variety of subjects, including mathematics, blueprint reading, layout and lofting, and jet engine theory is available to all Boeing employees.

APPLY TOMORROW IN PERSON:
