• Built-in Laundroguide
• 5 Year Guarantee on Automatic Transmission

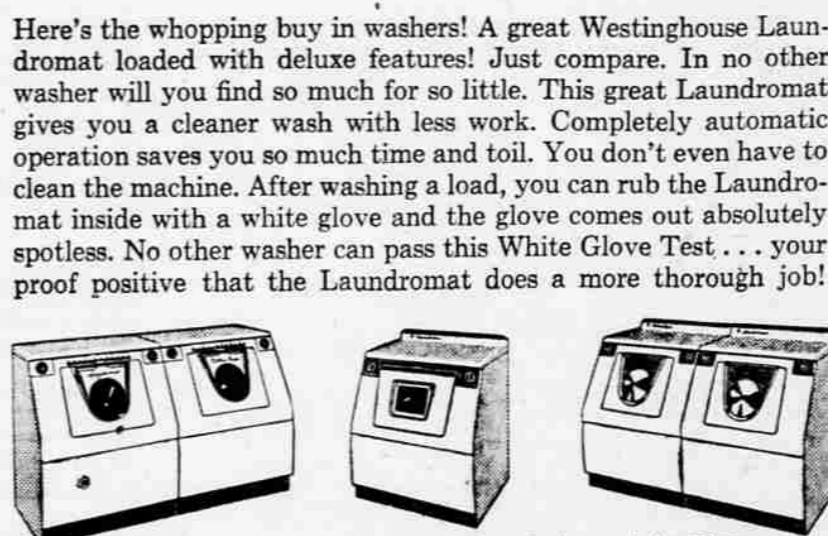

revolving agitator laundromat

washes cleaner, rinses better, cleans itself!

AT THE TV SAND TEST ON "STUDIO ONE" U.S. Marine Sergeant shows Betty Furness his white gloves, still spotless after he rubbed them inside Laundromat to see if machine cleans itself after washing heavy soil out of clothes.

Here's Why Revolving Agitator is Best:

- Washes Cleaner! There's no center-post. Clothes go inside Revolving Agitator which lifts, turns, plunges them 50 times a minute... washes all the clothes all the time.
Rinses Better! Equals 1500 hand rinses. Revolving Agitator lifts clothes while dirty water and soil drain away from them. Center-post washers strain it back through them.
Cleans Itself! Cleans the clothes, then cleans itself automatically. White glove rubbed inside machine comes out spotless, free of sand, soil, lint, scum.

YOU CAN BE SURE...IF IT'S Westinghouse

Compulsory Sewer Construction Sought

Hillsboro — (U.P.) — Dr. Charles Newberry, Washington county health officer, filed a certificate with the county court yesterday asking that it invoke compulsory construction of a sewage system in the West Slope sanitary district.

Voters of the district turned down a bond issue to finance a proposed sewage project by a 669 to 611 vote this week.

Dr. Newberry said that a health and sanitation emergency exists in the general area embraced by the district and planned further construction with plans to include septic tank sewage disposal.

The move was expected to halt about 90 per cent of all new construction in the fast growing Portland suburb and also complicate the resale of existing buildings.

Zellerbach Reports Successful Year

San Francisco — (U.P.) — Crown Zellerbach Corporation, with a host of new records in sales, earnings and production, today called 1956 "the most successful year" in the firm's 86-year history.

President A. B. Layton, in his annual report to stockholders, said net income last year reached \$50 million, an increase of 13.4 per cent over 1955. This return was worth \$3.53 a share of common stock as compared with \$3.11 in 1955, Layton said.

Layton was cautiously optimistic about 1957. He said it shows "some indications of tenderness in the market demand for some of our products," but is "balanced favorably" by new plants at Elk Falls, B.C., and Antioch, Calif.
