

State Police Report Five Car Accidents

Two drivers were cited but no serious injuries were reported in five auto accidents occurring in the county Friday and Saturday, according to state police.

Walter Hurlbut, 47, of 355 South Fourth st., Central Point, was cited for failure to signal after the car he was driving repeatedly burned into the path of another vehicle on the Central Point-Burritt rd. at 5:10 p.m. Friday.

Cars Damaged

Police said Burritt was traveling west on the road and started to turn into a driveway on the south side of the road. His vehicle collided with a car operated east on the road by Jesse Claude Long, 66, box 241, Jacksonville. Both cars were reported heavily damaged.

John Robert Garner, 19, of 905 1/2 West 10th st., Medford, was cited for having no operator's license after his vehicle collided with a pickup truck operated by James Marion Shoemaker, 49, of 1030 Jasper st., Medford, on Stewart ave. about 50 feet west of Highway 99.

According to police, Garner was traveling east on Stewart ave., and attempted to turn into a service station on the left side of the road. Shoemaker's car was traveling west on Stewart ave. at the same time and the vehicles collided. Both cars received minor damage. The accident occurred at 7 p.m. Friday.

Joseph R. Barti, 51, Longview, Wash., was treated for minor injuries at Ashland General hospital about 2:25 a.m. Saturday, after the car he was driving

News Briefs

ATTEMPTED WEDGE
Washington—(U.P.)—President Roosevelt tried to split Mussolini and Hitler in early 1939 with a warning to the Italian dictator that Hitler would desert him "at any moment."

State department records published Saturday showed that Mr. Roosevelt felt he stood chance of averting World War II if he succeeded in driving a wedge between the two Fascist strongmen.

SUGGEST REMOVAL
Washington—(U.P.)—The National Planning association recommended Saturday that the United States remove some of the restrictions on sending surplus farm commodities to iron curtain countries.

The research group said "the administrators of the programs should be free to make disposal agreements with iron curtain countries when and if there is an opportunity thereby to advance the aims and aspirations of freedom-loving peoples."

IDEAL PLACE
Washington—(U.P.)—Sen. Hubert H. Humphrey said Saturday the troubled Middle East is an ideal place to try out President Eisenhower's "open skies" disarmament and inspection proposal.

The Minnesota Democrat said "we should apply to such local situations as the Middle East some of the disarmament proposals we have been advocating for the whole world."

FREE VACCINE
Los Angeles—(U.P.)—Salk polio vaccine inoculation Saturday was offered free of charge by General Petroleum Corp. to its employees in the west, company medical director Dr. Edward P. Luongo announced.

Luongo said the inoculation would be available to employees of all ages, starting immediately at the company's medical installations.

PARACHUTE TO SAFETY
Tujunga, Calif.—(U.P.)—A California Air National Guard pilot parachuted to safety Saturday shortly before his F-86 jet crashed into rugged mountain country near here.

Air National Guard officials identified the pilot as Maj. Richard G. Candelaria, of Los Angeles, flight operations officer of the 195th fighter-interceptor squadron. He was uninjured.

'MODERN REPUBLICANISM'
Long Beach—(U.P.)—Sen. Albert Gore (D-Tenn.) said Saturday "modern republicanism" is nothing but an old GOP trick, "talk one way and act another."

Gore attacked the Eisenhower administration record and gave his prescription for Democratic victory in coming elections in a speech prepared for the fifth annual convention of the California Democratic council.

TNT FOUND
Boston—(U.P.)—Four cans of TNT were found wired to the horn and generator of an automobile driven by a young housewife Saturday. Police said if Mrs. Marie Portnoy, 22, of Boston had touched the horn "she would have been blown sky high."

The explosives were found by filling station attendant Arthur Sisto when Mrs. Portnoy asked him to check the oil at a gasoline station in Dorchester.

SOLDIER SHOT
Munich, Germany—(U.P.)—A German engineer shot an American soldier dead in the center of Munich Saturday.

Police arrested Ludwig Schwarzeauer, 52, immediately after the shooting. German and American military police were investigating but thus far had failed to determine the reason for the shooting.

Six Local Teenagers Injured in Accident; Klamath Boy Jailed

Six Medford teenagers were hospitalized and a 19-year-old Klamath Falls boy was jailed on charges of reckless driving and hit and run after a two-vehicle collision at 1:02 a.m. Saturday, at the intersection of East Main st., and Riverside ave., according to Medford police.

Driver of the hit and run car was identified as Ted Vinson Roberts, Klamath Falls, who was not injured in the accident.

Driver of the other vehicle was Marvin Dwayne Proehl, 16, of 303 Boardman st., Medford. Proehl was reported in "good" condition Saturday afternoon at Sacred Heart hospital, where he was taken for treatment of chest injuries.

Five Passengers
His five passengers, all of whom were injured, were Wilda DeAnn Abbott, 16, of 1212 Withington st.; Georgia Fern Merton, 18, of 1820 Kings highway; Lloyd Dean Rickard, 18, of 816 North Riverside ave.; Keith Arland Branson, 18, of 710 Palm st.; and Richard Allan Bourne, 17, of 510 Haven st. Rickard and Bourne, both reported to have sustained bruises, were discharged from the hospital Saturday.

Branson, suffering from undetermined injuries, was reported in "good" condition. Miss Abbott was reported to have received leg fractures and head lacerations and Miss Merton was believed to be suffering from shock. Their conditions were not listed as serious.

According to police, Roberts' car was traveling north on Riverside ave., and proceeded through a red light before striking Proehl's car, which was traveling west on East Main st. Police said they observed Roberts during routine patrol. They said he failed to yield the right of way when he entered Highway 99 from the parking lot at Cubby's drive-in in south Medford, about 1 a.m.

Police Give Chase
Police gave chase, with siren

and flashing red light in operation, but said Roberts increased his speed and went through two red traffic signals. Officers said they clocked Roberts' speed at 75 miles per hour as he went against the red signal at the intersection of ninth st. and Riverside ave.

According to police, Roberts' vehicle struck the left side of Proehl's car, throwing it into the northwest corner of the intersection. A parking meter and street sign were also struck in the collision. Roberts' car turned completely around, paused momentarily, then continued on north on Riverside ave., at an estimated speed of 45 miles per hour. Officers, who continued the chase, said Roberts' ran a red light at the intersection of Riverside ave., and Jackson st., before stopping.

Both Roberts and his only passenger, Walter Clayton Hurlbut, 18, Klamath Falls, were taken to the police station and Roberts was lodged in the city jail. Hurlbut was not held.

Force M-Sgt. James W. George, of Craig Air Force Base at Selma, said he saw the meteor as he was driving his car.

Brilliant Meteor Flashes Across Southern Heavens

New Orleans—(U.P.)—A brilliant meteor "with fire flying everywhere" streaked across the southern skies Friday night and apparently crashed to earth in the barren marshlands along the Louisiana coast.

The flash of light caused by the meteor or a shower of meteors was seen from Alabama to Texas, and authorities were checking reports that the falling object hit in the vicinity of Marsh Island, just off the Louisiana coast in the Gulf of Mexico.

The Coast Guard in New Orleans said radar men tracked the object on its weather scope into the area of Marsh Island, but were unable to tell if it reached the ground or exploded in the air.

Shook Island
The game warden on Marsh Island, a wildlife refuge, reported by radio to the New Iberia sheriff's office that the meteor "made a hell of a noise and shook the whole island." However, he didn't see it land.

Several men from the New Iberia sheriff's office rushed to the island to see if they could locate the meteorite.

Tremors were reported in the vicinity in a circular area with a radius of some 30 miles and apparently centered near Franklin, La., which is located between New Iberia and Marsh Island. Police said windows were broken at some points in the circle, which encompasses New Iberia, Opelousas and Lafayette as well as Franklin.

Thousands of calls flooded police, airports, Coast Guard stations, newspapers and radio stations in six southern states as mysterious light in the sky that appeared at 11 p.m. in southeast Alabama, Air

Is That So?

Almost every order of living things has its giants and mid-gets, its common types and others so curious that it is difficult to believe they are related. Of

such are the monkeys and their many relatives. Many range from the little marmosets and tiny lemurs, no more than five inches long, to great gorillas which may weigh 600 pounds.

In mental attainments lemurs

Coroner's Jury Acts In Rare Instance

Nyssa—(U.P.)—A Malheur county coroner's jury, acting in one of the rare instances where the subject of its investigation was still alive, ruled Friday that a Nyssa police officer was guilty of the crime of "assault with a dangerous weapon."

The inquest grew out of the shooting of 38-year-old George Espinoza in front a Nyssa tavern last week end.

Officer Martin Rich shot Espinoza when he said the victim resisted arrest.

The six-man coroner's jury said that Rich, acting without a warrant, was guilty of assault with a dangerous weapon under the laws of the state of Oregon.

The coroner's jury was called into session at the direction of District Attorney E. Otis Smith.

Rich asserted that Espinoza resisted arrest after he arrived at the tavern where Espinoza was pointed out to him as a person who had been creating a disturbance.

Espinoza is in a Nyssa hospital and was reported in improved condition Saturday.

Russians Propose Pool for Atoms

Moscow—(U.P.)—The Soviet government Saturday proposed the organization of an all-European economic and atomic co-operation institution in place of the projected Western European common market and "Euratom" Pool.

The Soviet proposal was released to correspondents yesterday at a press conference held by Foreign Ministry spokesman Leonid Hlychev.

The 12-page statement was delivered earlier to all European embassies and the American embassy.

The statement attacked Western plans for a "Euratom" pool of peaceful atomic energy resources and a common market to reduce trade barriers among Western European nations. It said such organizations were intended "to split Europe into blocs and were fraught with dangerous consequences for the whole of Europe."

Sports enthusiasts will be interested in the many new books on winter sports which are available at the Medford Public Library.

Ranger-Naturalist

show little more intelligence than the average mammal whereas a certain amount of forethought—if not reason—may be observed in the apes as they pile box upon box to get at food hanging above them.

But, ounce for ounce, the smaller monkeys have more brain weight compared to body than most other mammals. The orangutan's brain, incidentally, comes closest to man's but neither equals it in size nor in weight.

Most animals belonging to the monkey clan stick pretty close to the tropics in Asia, Africa and the Americas.

Except for a few, like the baboon and the aged gorillas, the great number of the monkey clan spend almost all their time in the trees. Here agility and good co-ordination are at a premium; and quite likely say the experts, the brains of the apes and monkeys seem to have reached their fine development in connection with the high degree of mobility which they have achieved in the trees.

Good Vision
Most have extraordinarily good vision—many possessing large eyes set more forward in the face than most other mammals which enables them to get a single image through both eyes and a good depth perception. Unlike the rest of the entire mammalian kingdom, some monkeys have acute color discrimination and doubtless see things much as humans do.

Babies—generally one at a time—are born helpless. When it is still very young the mother carries it wherever she goes clinging to one of her breasts. As it grows older, it often rides on her shoulders.

Although man is a primate along with the monkeys and apes in classification, he is not descended from them, asserts the editor of The Animal Kingdom (Greystone Press, N.Y.). Rather he comes from the same ape-like stock they do; all representing offshoots in different directions.

NO OTHER FOOD GIVES YOU SO MUCH FOR SO LITTLE AS MILK!

Delicious, refreshing, nourishing MILK! What a food! Milk goes with any meal—breakfast, lunch, dinner—and in between. Milk provides more different dietary essentials than are found in any other food! The same unmatched food value which makes milk the Number One food in the infant's diet is just as important throughout life to maintain the glow of good health and general well-being. To equal the food values in just one quart of milk would cost you more than twice as much with other foods. Serve milk daily.
