Cadillac

Speaks A Language All Its Own!

Take a good look at this gentleman as he strides out into the early morning to his waiting car.

In all probability you feel—as we do—that you know a goodly number of things about him.

First of all, we would be willing to venture that he is a man who holds to high standards of achievement.

We would guess that he is held in high personal esteem by his friends and associates.

And we would also suppose that he is a practical man who is keenly aware of the basic value and worth of the things around him.

The reason for all this is not far to seek.

For the motor car that awaits him at the curbside bears the beautiful crest of Cadillac. And here, beyond all conjecture, is the most eloquent spokesman in the entire realm of possessions.

In fact, the Cadillac car has, over the years, been so closely associated with the leading citizenry of our land that the two have become all but inseparable in the public mind.

And just as these motorists have placed their trust in Cadillac, so Cadillac has given them everything they could hope for in an automobile.

Cadillac has given them unduplicated beauty and luxury . . . unsurpassed performance and comfort . . . and extraordinary quality and value.

Have you driven a 1937 Cadillac? If not, we urge you to come in and let the car tell you its own thrilling story on the highway.

We think you will agree that this year, more than ever, Cadillac speaks a language all its own!
