'Pill' Broadcasts Commentary on Digestive Tract

New York—(U.P.)—A radio pill which can broadcast a running commentary as it passes through the human digestive tract was displayed Monday by its scientific inventors.

As easy to swallow as an aspirin tablet, the tiny transmitter is expected to be of particular usefulness in studying certain disorders of the colon and in increasing medical knowledge of the muscular operations of the intestinal system.

The pill is a plastic capsule about one and one-eighth inches long and four-tenths of an inch in diameter. Inside it is a transistor oscillator whose frequency is modified continually by the variations in pressure to which it is exposed. One end of the capsule is a pressure sensitive rubber diaphragm which transmits those pressure changes to the broadcast unit.

The pill was developed and demonstrated by Dr. Vladimir K. Zworykin, affiliate in biophysics in the Medical Electronics Center of the Rockefeller Institute and Honorary vice president of the Radio Corp. of America, and Dr. John T. Farrar, chief of the gastroenterology section of the new Veterans Administration Hospital and assistant professor of clinical medicine at Cornell University College of Medicine. The pill was engineered by RCA and will be tested jointly by RCA, the Rockefeller Institute and the VA.

The pill's broadcasts can be picked up by a receiver outside the body and recorded. Its progress can be traced by fluoroscope and it can be held in one place or guided by magnets from outside the body.

Needy Doctors Due To Get Helping Hand

Chicago—(U.P.)—A movement to give financial needy doctors a "helping hand" is spreading throughout the United States, the Journal of the American Medical Association has reported.

An article in the Journal said a recent survey showed that more than \$1,000,000 is available annually in medical scholarships and loan funds.

Many programs are geared to help the doctor at a critical point in his career—when his basic medical education is finished and he is "at the end of his financial rope," the Journal said.

The article said the Sears-Roebuck Foundation is leading the movement with its long-term unsecured loans of up to \$25,000 for needy doctors in communities that need doctors.

Scholarships and loans are offered in "doctor-help-doctor" programs supported or administered by 20 state medical associations. The Student American Medical Association, hospitals, and various other organizations and firms also have assistance programs, the Journal said.

MEDFORD (OREGON) MAIL TRIBUNE—FIVE

Nordic Unity Meeting Topic

Helsinki, Finland—(U.P.)—The foreign ministers of Finland, Sweden, Norway, Denmark and Iceland met here Monday to discuss Nordic unity. The meeting coincided with a series of Soviet atomic threats aimed at Denmark and Norway.

The five nations, members of the Nordic council, did not place the threats on their formal agenda, but informed sources said new Soviet moves in the cold war may be the major topic of the secret discussions.

It was doubtful the five countries could reach a policy decision on the issue which they could publish in a communique since Sweden and Finland are "neutral" nations while the other three are members of the North Atlantic Treaty Organization.

Iceland came in for its share of Soviet propaganda blasts last year but has escaped the new campaign which has raked western Europe.

However Sweden has been the objective of recent Soviet verbal attacks for its "unfriendly attitude."
