A modern sculptured pitcher and bowl with Oriental base create interest atop a buffet or server.

IN THE DECORATING world, little things mean a lot. Take accessories, for example. They spark new interest in interiors by contributing touches of glamour and color. In fact, something as simple as an attractive new flower container or sideboard ornament can revitalize a tired room. There's a world of exciting pieces to choose from—bowls in imaginative free forms, striking console sets, and tableware that sets up an eye-catching color display. In tune with contemporary trends, these decorative accessories can perk up one's home without disrupting one's budget.

Three boat-shaped ceramic bowls mounted on brass bases make up into this console set that's perfect for highlighting a dining table or a sideboard.
