

NEW TYPE "DOG"—Larry E. Juniper, right, owner of Pacific Machinery company, Medford, isn't complaining because his business has gone to the "dogs" lately. Juniper recently developed a new type sawmill carriage dog which is such an improvement over the old type that he is getting orders for them from sawmills along the Pacific coast. The air-operated units are manufactured by Pacific Machinery company, 1910 Table Rock rd. One of the advantages of the air tong dogs, as they are called, is that they grip the log better and minimize defacing of the wood, Juniper said. Juniper is shown above with machinist Roger Kornstad as they inspect one of the dogs that has been crated for shipment.

New Credit Regulations Expected in Argentina

Buenos Aires —(U.P.)—Anxious Argentine importers awaited announcement of new government credit regulations Saturday to allow them to resume business.

All Argentine banks and exchange brokers suspended credit operations for imports at noon Friday on order of the Argentine Central bank.

Financial sources said the move was a forerunner of new regulations restricting credits for import in an effort to conserve the nation's dollar supply and hold down inflation.

Denver, Colo.—(U.P.)—Mrs. Flossie Mae Martin was granted a divorce Friday on testimony that her husband sometimes threw the family eat at her when he became angry.

Hollywood—(U.P.)—Columbia Studios has achieved a new high in type casting. The role of Joel Collins in the film, "The Mad Ball," will be played by actor Joel Collins.

Scotch Undoing for London Shopkeeper

London —(U.P.)—Shopkeeper Sid Lockyer, 57, told a bankruptcy court Saturday he had at least 23 children by two wives.

"But it's not the kids, bless 'em, who have been my undoing," he assured the court. "It's the booze. Four or five bottles of scotch a week."

The path of an ordinary tornado is about one city block in width.

'Chance in a Million' Brings Death to Girl

Belfast, Northern Ireland —(U.P.)—A "chance in a million" brought death to eight-year-old Ruby Geoghagan, a coroner's inquest showed Saturday.

Ruby bent over to pick up her doll and was struck by a stick thrown by a boy playing nearby. Her lip was cut and tetanus germs from the stick entered her bloodstream. A week later Ruby complained of a toothache and was hospitalized. She died five days later of tetanus poisoning.

Funds Earmarked for Industry Promotion

Grants Pass—The Grants Pass and Josephine County Chamber of Commerce has earmarked a \$10,000 item in this year's budget for promotion of industrial development.

The announcement was made Thursday following discussion by Sidney Bazett of steps taken to date by the industrial committee for new industries, including a pulp mill somewhere in the area.

Change in Law
Bazett said a change in Oregon law would be necessary before water could be taken from the Rogue river for industrial use. Local sportsmen agreed to go along with this amendment, provided any industrial water use would be subject to requirements and standards set up by existing water use agencies, he said.

Bazett explained the proposed mill would have an initial 300-ton capacity and would be a kraft rather than sulphite operation. He pointed out, however, that subsequent additions might include production of other forms of paper. He estimated such a plant would provide employment for about 700 people. Identity of the company reported interested in such a plant was not revealed.

Preliminary work would include survey of sites and consideration of effluent disposal, prevention of air pollution, availability of adequate transportation and other engineering problems. These would be done by Sandwell and company, Vancouver, B.C., firm which designed pulp mills at Albany and Toledo, Ore.

Cost of Survey
It is estimated cost of the survey would be \$4,000. This would be shared by the Oregon Development commission, the Josephine County Development committee and the Jackson County Chamber of Commerce. The Jackson county chamber would raise \$1,000 for the survey and the development commission would contribute \$2,000.

Nuclear Explosion Blamed in Fallout

Lansing —(U.P.)—A nuclear explosion set off by Russia recently was blamed Friday for a five-fold increase in radioactive fallout in Lansing last week.

Recording instruments at Michigan department of health headquarters showed fallout April 11 was 7.0x10-6 microcuries per cubic meter of air, compared with 1.5x10-6 microcuries on an average day.

Thursday's fallout was about one-fortieth of a dangerous dose for humans.

Community Asks UN To Probe Vandalism

Luebeck, Germany —(U.P.)—The Jewish community of this north German city Saturday demanded a United Nations investigation of vandalism in its cemetery.

A spokesman for the community made up largely of Jews who survived Nazi concentration camps, said the community was not satisfied with police theories that the vandalism was a juvenile prank. The cemetery has been hit by vandals three times since the war.

SHORTAGE EASES

Washington—(U.P.)—The public health service reports the polio vaccine shortage has "eased somewhat" in the last several days. However, Surgeon General Leroy E. Burney, who issued the report, added that demand for the vaccine probably will exceed the supply for some time to come.

Lack of Weapons Might Break NATO

Bonn, Germany—(U.P.)—Chancellor Konrad Adenauer warned Saturday that refusal to equip the West German armed forces with tactical atomic weapons would mean the break-up of the NATO and Western security defenses against Communism.

Addressing a Christian Democratic Party congress at Cologne, Adenauer angrily declared that West German soldiers must not be given equipment inferior to that of their North Atlantic Treaty allies.

He again sharply attacked 18 of West Germany's leading atomic scientists who have protested against giving A-weapons to West German forces.

The 81-year-old chancellor accused the scientists of "playing politics." But he offered to discuss personally with them at any time the political side of this issue, which has suddenly become one of the most explosive in West German politics.

12-Day Strike Settled In Chile Dispute

Santiago, Chile —(U.P.)—A 12-day strike involving 7,000 workers of Kennecott Copper company's El Teniente Mine has been settled, the government announced Saturday.

Labor Minister Raul Barrios said the strikers accepted the company's offer of a 30 per cent pay boost. They had asked 40 per cent. El Teniente is Chile's second largest copper mine.

you can Measure Security..

You can measure your family's security by the amount of money you have accumulated . . . to soften the blows of adversity. You can measure your ability to achieve security for your family by your saving-power . . . the wisdom to set up a program of systematic saving, the persistence to follow your program faithfully. If you have the will, we have the way!
