

## Work Started On Bridge

By HELEN BOTTEL  
Cave Junction—Work began Tuesday on a new cement bridge over the Lone Mountain valley near O'Brien. It was the last step toward a hard top paving job on the two-mile stretch this summer.

The realignment of the bridge will straighten out the last bad curve on the road, which was completely rebuilt by the Josephine county road department last fall.

Loads of gravel were hauled in Wednesday as grading got underway. A temporary bridge has been built to take care of traffic on the road which leads to timber and mining areas in the hills near High Plateau.

According to road department officials, bridge work will be finished within a month, and the hard top is to be applied immediately.

President Marg Cooke provided Easter decorations, using colorful baskets and spring flowers. She served cake and coffee to Legion and auxiliary members following the two business sessions.

Glenn Morrison Post 70 of the American Legion held its initial nomination of officers Wednesday night. Nominations are to be conducted twice more before the election in June.

**YOU have a stake in higher education**

This country needs educated people as never before, and the need will increase. Our whole future may depend on men and women who have learned in college to think soundly and choose wisely—in business, in industry, in civic affairs.

Our colleges are facing a crisis. Already the pressure of applications is straining their capacity. It will double by 1967.

It's not just a matter of adding classroom, laboratory and dormitory space. Facilities, too, must be enlarged and strengthened. High standards of teaching must be maintained. That means increased salaries for professors.

For your own sake, your children's sake, your country's sake, help the colleges or universities of your choice—now!

If you want to know what the college crisis means to you, write for a free booklet to: HIGHER EDUCATION, Box 36, Times Square Station, New York 36, New York.

## Frogs May Become Extinct in England

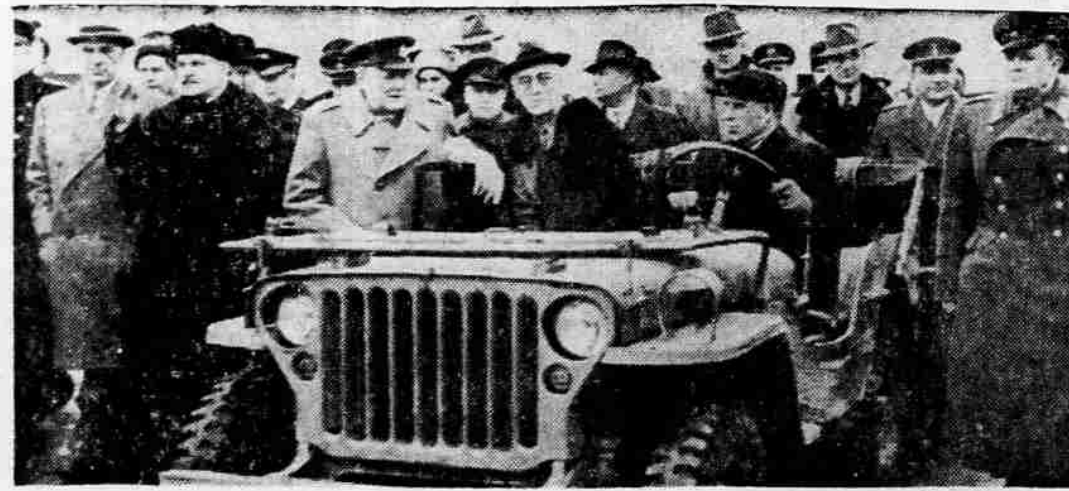

London—(U.P.)—Frogs may become extinct in England within the next 50 years because of the encroachment of civilization, Zoologist Alfred Leutscher predicted today.

Leutscher, founder of the British Herpetological society, blamed disappearance of frogs on modern drainage systems, in which they cannot live, and the diminishing number of ponds that have been used for centuries as spawning grounds.
