

This is the one that's delicious for drinking!

*New Carnation Instant
"MAGIC CRYSTALS" Milk Discovery!*

 Carnation Instant is the new crystal form of freshest, pasteurized nonfat milk. Absolutely pure, nothing added. New *Magic Crystals* that burst into delicious fresh flavor instantly, even in ice-cold water! Ready to drink. Ready instantly for cereals,

cooking, baking—no special recipes needed! Rich in all the good natural protein, calcium and B-vitamins of fresh whole milk—so important for strong growth, sound teeth, good digestion! Today, enjoy the delicious fresh flavor of new Carnation—the "Magic Crystals" Instant!

Prove the difference yourself!

**For
Drinking,
Cooking,
Baking—
NOW SAVE
ALL THREE
WAYS!**

Only Carnation Magic Crystals mix instantly in ice-cold water, with a light stir.

Only Carnation Magic Crystals mix completely. No trace of pasty residue.

In Convenient 3-Qt. and Economical 8-Qt. Sizes

How to Park Your Car

by Richard Day

HAVE YOU ever had to park your car with half a dozen motorists impatiently waiting for you to get out of the way? If you could wheel your car right in, without seesawing back and forth, these horn-happy drivers would be properly squelched. You can do it, too, if you follow these instructions and practice parking a few times.

Pull up even and parallel with the parked car and one to two feet away. Give the engine a little gas and back up slowly.

When you are two feet back, begin cutting the wheel to the right. Then cut all the way, still backing slowly. Watch for traffic and careless pedestrians.

Continue backing until you're at a 45-degree angle with the street—then stop. If the street ran from 12 to 6 across your watch, your car should point to 7½ minutes of the hour. *This angle is the secret to success!*

Straighten wheels and go back until your bumper lines up with the front car's rear bumper. Cut hard left and squeeze in without touching bumpers.

Keep backing until wheels nearly touch the curb. Your right rear wheel should be six inches from the curb. If something went wrong, pull out to the 45-degree angle and begin again.

Straighten wheels as you inch up to the center of the space. Set hand brake (except in freezing weather) and put car in gear. If parked uphill, cut wheels out; if downhill, cut them in to avoid rolling.
