The Medical Roundup

by *Walter Alvarez*
Emeritus Consultant in Medicine, Mayo Clinic
Emeritus Professor of Medicine, Mayo Foundation

Pain after Shingles

Many elderly people ask what can be done for the miserable and often devastating pain that, in the cases of older patients, lasts sometimes for many months after an attack of shingles. In the London Lancet, Dr. W. R. Russell and associates say that a doctor can sometimes help by repeatedly injecting procaine under the scarred area with the idea of blocking the nerves.

It is said that it helps, also, to use a vibrator gently on the area for from five to 10 minutes every so often. Some patients have told me that it helps to freeze the skin with an ethyl chloride spray.

Cutting the nerves apparently hasn't worked because, for some time, I have seen no articles on this operation. In acute cases, injection of Protonide can help.

Aneurysm or Blow-Out in An Artery

Every year some people get into serious trouble because of a blow-out in one of the large arteries of the body. What happens usually is that there has been ulceration in a segment of the artery; this weakens the wall and then a bulge comes, much like the bulge in a weakened tire. The danger, of course, is that some day the blow-out will be complete. Sometimes the person suffers much pain because the pulsating and growing tumor puts pressure on bones and nerves and other organs surrounding the artery.

Years ago, there was little that could be done for these aneurysms, but now expert surgeons are going in and removing the blow-out and substituting perhaps a piece of specially-prepared artery from some animal, or a bit of artery made out of nylon or some other material. During the last few years a whole new branch of artery surgery has come into existence.

In the old days a man had to have a leg amputated because of an impending blow-out in the big artery back of the knee. Today, many of these legs are being saved.

Dr. Alvarez hopes his readers will understand that it would be impossible for him to answer requests for information or to attempt to diagnose by mail.

CONSTIPATED?

New laxative discovery un-locks bowel blocks without gag, bloot or gripe

Constipation is caused by what doctors call a "thrifty" colon that, instead of retaining moisture as it should, does the opposite: robs the colon of so much moisture that its contents become dehydrated, so dry that they block the bowel; so shrunken that they fail to excite or stimulate the urge to purge that propels and expels waste from your body.

To regain normal regularity, the dry, shrunken, constipating contents of your colon which grow block your bowel must be re-moistened. Second, bulk must be brought to your colon to S-T-R-E-T-C-H stimulate it to action; to a normal urge to purge.

And, of all laxatives, only COLONAM, the amazing new laxative discovery possesses COLONAM's great moistening capacity, plus COLONAM's stretch-stimulating bulk. So effective it relieves even chronic constipation overnight, COLONAM is yet so smooth, so gentle it has proved safe even for women in critical stages of pregnancy.

Superior to old style bulk, salt or drug laxatives, COLONAM neither gags, bloats nor gripes; won't interfere with absorption of vitamins and other valuable food nutrients; in clinical tests, did not cause rash or other reactions.

It's a physiological fact: Exercise tones your body! And COLONAM exercises your colon to tone it against constipation, overnight! Get COLONAM, in easy-to-take tablet form at any drug counter, today! Only 96c for the 60 tablet package, brings positive relief at less than 2c per tablet.
