The Medical Roundup by Walter Alvarez

Emeritus Consultant in Medicine, Mayo Clinic Emeritus Professor of Medicine, Mayo Foundation

Sleeping Pills Scores of people ask if it is safe to take sleeping pills year in and year out, and I say, 'Yes, I believe it is.'

No Deterioration For 10 years I watched a physician who had got out of a mental hospital and back into a big practice by taking about ten grains of a strong sleeping medicine each day.

In quite a few cases I have allowed persons who were formerly chronic alcoholics to take barbiturates each day, if this meant that for years the man was able to leave liquor alone and to keep at work.

My feeling is that it is impossible to help many highly tense and jittery persons, and to get them out of a nervous breakdown unless one sees to it that they get sleep.

Every so often, in some lay magazine, I read a highly alarming article to the effect that a sleeping-pills producer has a habit as morphia, but this I find hard to believe because never in my life have I seen it.

Nephrosis Many anxious parents ask what can be done for nephrosis. This is a disease usually of children, who tend at times to swell up almost as if they were in a diving-suit.

Chicago—Oil from "dry" wells may be forthcoming as a result of new techniques. Research on this subject at Armour Research Foundation of the Illinois Institute of Technology involves combustion in porous media.
