

ATTENDING GOVERNORS' CONFERENCE at Williamsburg, Va., Gov. and Mrs. Frank Clement, Tennessee, can't resist temptation to try out stocks at restored jail of old colonial city. Both agreed stocks were thoroughly uncomfortable. (International Soundphoto)

Lions Convention Speaker Asks Russia To Let West See Explosion

San Francisco—P—Carlos P. Romulo, Philippine member of the United Nations Security Council, asked the Russians today to let observers from non-Communist countries witness a Soviet atomic explosion.

Romulo voiced this plea for the second time in recent weeks in a speech prepared for delivery at the 40th annual convention of Lions International.

He cited a recent television appearance by Nikita Khrushchev in which the Soviet leader "by implication" claimed the Russians did not have to announce their atomic tests in advance because they were not harming anyone.

Fallout From Russia
Romulo cited testimony before a congressional committee on June 5 by Dr. Ralph E. Lapp, formerly an atomic physicist for

the United States government.

He quoted Lapp as saying: "The air mass trajectories from Central Siberia (site of the Russian atomic tests) frequently sweep across the islands of Japan, especially Hokkaido. They also produce tropospheric fallout over the United States as well. Here in Washington, you could swipe a kleenex over a car top and cause a geiger counter to respond readily."

Romulo said Japanese sources have informed him that Soviet tests produce "79 per cent of the fallout observed in Japan. Pacific tests account for 29 per cent and the Nevada shots add 10 per cent."

"This the peoples of Asia must know," Romulo said. "It is Soviet Russia's nuclear tests that are endangering Asia lives."

Blocked Communism
Lions International opened its convention Wednesday with a message of high praise from President Carlos P. Garcia of the Philippines for having played a key role in blocking the expansion of Communism in the island republic.

At a district governors' luncheon, District Governor Eugenio Eusebio of the Philippines presented on behalf of President Garcia a plaque to Lions of California and Nevada, citing them for their "invaluable contribution to the fight against and in the virtual destruction of Communism in the Philippines."

The western Lions had responded to a plea in 1954 by the late President Ramon Magsaysay to provide farm tools for Huk dissidents being stirred into revolution by the Communists.

Lions collected more than 25,000 tons of farm equipment, food and clothing which were shipped to the Philippines.

Thousands Witness Parade
The Lions took over downtown San Francisco Wednesday with a huge parade witnessed by thousands.

Among the winners in the parade were:

Juvenile bands: Bonham Brothers Band of San Diego, second.

Adult bands: Vernon McIntosh Girls Pipe Band, British Columbia, first.

Lions classification floats: California District 4B-1, first; Utah District 28, second; Modesto, Calif., Lions Club, third.

Marching groups: Sanger, Calif., High School band, third.

Uniformed delegations: Pacific Northwest, first; California-Nevada, second.

Continued Testing Claimed Price of Clean H-Bomb

Washington—P—The weapons people have told President Eisenhower that the price of the clean H-bomb is continued testing.

They put it to him less bluntly than that: They said "give us four or five years to test each step of our development and we will produce an absolutely clean bomb."

The President so quoted them at his news conference Wednesday. But he went on to say that he is nevertheless determined to "go right ahead" with American proposals for suspension of tests as a first step toward ultimate disarmament.

So whether the clean H-bomb ever is perfected remains to be seen.

By "absolutely clean" the weapons scientists don't mean just 95 or 96 or 97.5 per cent clean. They mean an H-bomb that would generate no radioactive fallout whatever.

Fission Not Clean
There is no such thing now.

The weapons makers cannot now produce an H-bomb without an atomic fission trigger, and no weapon with fission in it is clean. Fission is the source of all the weapons radioactivity that the world is so upset about.

The scientists who put the test issue to the President this week were Drs. Ernest O. Lawrence, Edward Teller and Mark M. Mills, all of the University of California radiation laboratory at Berkeley. That is the outfit that runs the Atomic Energy Commission's hot-shot weapons lab at Livermore, Calif.

Eddie Fisher Miffed Over London Incident

London—P—Singer Eddie Fisher, who is one of Princess Margaret's favorite entertainers, was reported miffed today at a publicity man who allegedly annoyed the princess and snarled a royal singing engagement.

Fisher, now vacationing in Paris, could not be reached immediately for comment.

Sources here said Eddie was invited to sing tonight at a charity ball at London's Savoy Hotel, at which Princess Margaret is guest of honor. But the invitation was reported cancelled because of the work of the unnamed publicity man.

The sources said the drum beater, without Eddie's knowledge, said if he received a personal invitation from Clarence House, Margaret's London home, Clarence House officials replied curtly there was "no question" of an invitation from the princess.

Remnants! Remnants! Two Big Tables. Mostly 1 to 2 1/2-yd. lengths. All types of materials. Drastically Reduced!

Lucky Lager Buys Brewery in Utah

Salt Lake City—P—Completion of the sale of the 73-year-old Fisher Brewing Co. here to Lucky Lager Brewing Co. of San Francisco has been announced here by officials of both firms.

A joint statement issued by Frank A. Fisher, president of the Utah company, and Eugene E. Selva, head of Lucky Lager, said the sale would become effective July 1.

The two officials said Fisher Brewing would be operated under its own name as a separate company of Lucky Lager.

No sale price was disclosed but it was believed the transaction involved about \$12 million.

At the same time, a law suit in which Fisher had charged Lucky Lager with price cutting and unfair competition in Utah was dismissed.
