Comfort in Contemporary Terms

THE SCANDINAVIANS have a special way with contemporary furnishings. Take designer Folke Ohlsson, for example. There is nothing stark about his dining- and living-room pieces because he leavens simplicity with graceful curves and imaginative details. This imported furniture is beautifully suited to today's living. It's light in scale for our smaller rooms and has low lines for use in wall spaces under windows. And while the collection is notable for clean lines, there's a feeling of elegance about it, too. This is especially true of the tables, chests, and desks in walnut and teak. The designs themselves are refreshingly varied, but related in size and materials to make up coordinated groupings. In addition, they all put comfort first, proving that sensible construction and smart styling are not incompatible.
