Scotland, Conn. — A town, celebrated its 100th anniversary, noted that the population in 1857 was 550, the same as now.

Mt. Clemens, Mich. — A Ferdinand Blank has invented a new air vent valve for a plaster cast to stop itching along broken bones.

The Medical Roundup

by *Walter Alvarez*

Handbook For One-Handers

The other day, as I saw a man with an empty right sleeve, life thought came to me, when a man loses an arm, how much he must quickly learn about taking care of himself: tying his tie and his shoe laces—even putting on his coat. On reaching my office, I found a copy of Mr. Aaron L. Danzig's "Handbook for One-Handers—A Practical Guide for Those Who Have Lost the Functional Use of an Arm or Hand." (Federation of the Handicapped, 211 West 14th St., New York 11, N.Y.) and there I found the answers to the questions that had come into my mind. There I read how a one-handed man can button and unbutton his clothes, put on a glove, shave, cut his fingernails, put on a wrist watch, read a newspaper, open a can or a jar, cut meat at the table, butter his bread, make a bed, play golf, get on a horse, drive a car, shake hands, and shuffle a deck of cards!

Neatness and Cleanliness in Moderation

While on the subject of interesting books, I will mention one I chucked over recently—"The Family Book of Child Care," by Niles Newton (Harper's). The chapter that amused me was headed, "Neat and Clean in Moderation." I thought of all the many fussy and precise women I've known who made themselves unhappy and ill and full of headaches and nerves because they were always trying to change a normally rowdy and dirty boy into a prim, white-collared and velvet-jacketed Little Lord Fauntleroy. A few hundred times I have told such mothers, "Don't worry about your boy's dislike of bathing and dressing neatly; one of these days, when he is 14 or so he'll discover a girl, and then you'll be fussing because he spends an hour in the bathroom, scrubbing himself and grooming his hair."

Hydrocortisone Counteracts

Recently, Drs. William Deichmann, John E. Dees, M. L. Keplinger, John E. Farrell, and Wm. E. MacDonald, Jr., reported that hydrocortisone is a very life-saving drug when given to animals that have suffered poisoning from rattlesnake venom. Instead of only the 17 per cent of the untreated animals that survived, 75 per cent of treated animals were saved.

Rattle-Snake Venom

Recently, Drs. William Deichmann, John E. Dees, M. L. Keplinger, John E. Farrell, and Wm. E. MacDonald, Jr., reported that hydrocortisone is a very life-saving drug when given to animals that have suffered poisoning from rattlesnake venom. Instead of only the 17 per cent of the untreated animals that survived, 75 per cent of treated animals were saved.
