Mail Fraud Quacks

As I noted recently, Postmaster General Summerfield has issued fraud orders against 106 persons or firms that each year have been stealing \$50,000 from our people by promising to cure diseases by mail. It looks now as if crooks have found that this is the most lucrative business they can get into. One of the Postal investigators who goes about checking up on quacks was amused to find that most of those who advertise to cure baldness are bald themselves!

Effects of Atom-Bomb Fall-Out
Last year, in a book (number 461) published by the National Research Council, Drs. J. V. Neel and W. J. Schull, experts on genetics, summarized the careful studies that have been made of the children resulting from over 70,000 pregnancies of Japanese women exposed to bomb radiation in Hiroshima and Nagasaki. For years it has been feared by some scientists that this radiation might produce in the ovaries a large number of so-called mutations, which would result in malformed infants; but, actually, no definite excess of defective infants was found. This should go far now to cheer some of the people who at present are so panicky about "fall-outs."

A Woman About to Have a Baby
All women who are about to have a baby could be greatly helped by reading a book with the title, "Getting Ready for Parenthood," by Dr. Mario A. Castallo, (Macmillan Co., N.Y.). It gives all the information that a woman wants during her pregnancy; it tells her what to expect during labor; it tells what clothes to take to the hospital, and it tells something of two to care for the baby after he or she comes. It is clearly written and with nothing to frighten the prospective mother.

A Salt Poor Diet For Dizziness
People keep asking about a salt-poor diet for ear noises and dizziness. It can be tried, and I hear that occasionally it does some good. I myself might try this diet if it did not soon show signs of helping me. Many people find it very unpleasant to live on an unsalted diet, and wives of these patients tell me that the husband complains bitterly about his tasteless food. As my physician would point out, there are all grades of salt-poor diet, some bearable, some almost unbearable, and some even dangerous to life.

Flu Vaccine Expected Early in September
Portland—No Asiatic flu vaccine is expected to be available for distribution in Oregon before early September, the state board of health announced here Friday.

A department spokesman said the announcement was made to answer "numerous" telephone inquiries from individuals and industries calling private physicians and public health authorities in an attempt to obtain the new vaccine before a possible Oregon outbreak of the flu.

Dr. Gordon C. Edwards, acting state health officer, said latest reports received by his department indicate chances for shipments of the vaccine to Oregon before early September "are quite remote."
