It is easier to make buttonholes in thin material if you first rub it on the wrong side with a little library paste.

If during painting, some splatter dries on crystal or glassware, don't try scraping it off. You will scratch the surface. Instead, soak the glassware for a few minutes in a sink full of hot water to which has been added one-half cup of sal soda concentrated. The sal loosens the dried paint. Rinse and dry.

Stitching on plastic should be done with mercerized thread, using a long stitch and fine needle. Don't use nylon thread.
