

Stocks Put Up Good Show; Gains 3 Points

New York — Stocks put on a good show today, ringing up gains of as much as 3 points or more.

The advance restored more than two billion dollars to market valuations and just about offset Monday's losses.

Aircraft were strong on the belief that Russian claims of having developed an intercontinental ballistic missile may spur the U.S. missile program. Steels strengthened on an improved business picture. The oils were wanted. Chemicals and pharmaceuticals met support. Rails boasted a number of strong spots.

LIVESTOCK
