San Marino Gets New Government

San Marino — Opposition groups which ousted the Communist rulers of San Marino established a new government in this tiny republic today. Italy promptly granted formal recognition to the new anti-Communist regime.

The Communists have ruled San Marino since World War II. But recent defections suddenly put the Communist bloc in a minority in the 60-man ruling Grand and General Council and the non-Communist faction demanded a change in government.

The anti-Communist majority in the council proclaimed itself the legal government shortly after the regular terms of Communist captains expired at midnight.
