APPLEGATE VALLEY Radio Hams Hear Satellite

By MAUDE ZIEGLER
Applegate Valley — The intrigue of the secret world of radio "hams" was brought to light here after two Applegate operators announced they had received messages from the Russian satellite.

Marvin Throne, band instructor at Ruch who resides at Gold Hill, received messages for an entire afternoon. Throne has a new short wave set, and will soon be a licensed operator. Charles Williams, who is with the Ford motor company at Medford, said he received messages with regularity on the same day, at one hour and 35 minute intervals. The signal was audible for five minutes, fading to a very weak sound as it entered and left the radio range.

Williams is a veteran "ham", and has been at the business since 1927. His greatest interest lies in contacting distant stations in Europe, Africa, Russia, Japan, and Pacific islands. His newest and most unusual communication was with men on an island of ice in the arctic circle. He also had received a card with the personal signature of the radio operator and commander in charge of the group. Williams' information stated that the ice island is four miles wide, ten miles long, and 160 feet thick, and is estimated to have broken from the main ice mass about 1925. The island moves about 1.2 miles per day, and a base has been established there to determine the flow of ocean currents.

The "ham" operators send cards through bureaus, one of which is established at John Day, Ore., and may receive a collection of 40 or 50 at one time. Williams was instrumental in providing communication during the Long Beach earthquake emergency in 1933.

The first issue will be presented about No. 10. Officers include Ed Ramsay, president; Larry Tweedy, vice president; Mrs. Francis Gregory, secretary; Mrs. Glenn Travis, treasurer.
