RADIO PROGRAMS - MONDAY

Table listing radio programs for Monday, including stations like KVCJ, KVMJ, and KWIN, and programs such as 'News of America', 'Yawn Patrol', and 'World News Roundup'.

The Medical Roundup

by Walter Alvarez, Emeritus Consultant in Medicine, Mayo Clinic. Emeritus Professor of Medicine, Mayo Foundation.

Hypnotism Every so often there is a flare-up in interest in hypnotism, and one reads of operations performed during a hypnotic trance; also, of babies brought into the world while the mother was freed of pain. People are now writing Dr. Alvarez to ask me if hypnotism will cure their nervousness or their tendency to alcoholism, or if it will help them to lose 75 pounds of weight!

I have been reading articles and looking through a few books on hypnotism, and the impression I get is that the procedure will give a woman a strong suggestion that she should recover, but like all suggestions, its effects are likely to fade; hence I do not feel like having my patients treated with this method. I would suspect that there are grave defects in the technique, although for a hundred years, again and again, men have become enthusiastic, and have used the method and publicized it widely, it has never been much used by the rank and file of neurologists and psychiatrists.

That it has dangers is shown by reports of persons who have remained nervously upset for some time after a short period of hypnosis. Before me is a letter from the mother of a young woman who, 18 months ago went up on a stage to be hypnotized. The mother says that ever since, her daughter has been "completely haywire." She considers herself in love with the man who hypnotized her, and is giving him all the money she can lay her hands on. She has left her lovely home and has deserted her husband and her two children. Naturally, the woman's family are heart-broken over the affair. Without knowing all of the details, no one can say how much of this tragedy is due to the hypnotizing and how much to an ordinary "case" on an interesting man, but certainly, getting hypnotized "for fun" did this woman no good.

I think people would be wise to wait a while to see if the present flare-up of interest in hypnotism gets stronger, or if the fad fades out, as it has already faded out in the past.

Isolation of the Virus of Mumps Important is the news that comes from Drs. J. P. Utz, H. G. Cramble, C. F. Szwed, Mr. J. A. Jasel and Dr. R. H. Parrot, of the National Institute of Allergy and Infectious Diseases, The National Institutes of Health, Bethesda, Md., to the effect that the virus of mumps has now been isolated from patients with this disease. This now raises the hope that before long we can have a protective vaccine.

Although mumps is commonly a mild disease, in some cases it is very dangerous to health. As most people know, it can attack, not only the salivary glands at the corner of the jaw, but it can seriously injure the testicles, the ovaries and the pancreas (the large digestive gland which lies behind the stomach). Worse yet, occasionally it produces an encephalitis (brain fever) or a meningitis which can leave the person mentally crippled.

Andy's Jeweler - 15 NORTH CENTRAL

Beverly's TV & Radio - 634 Crater Lake Avenue

TELEVISION Radio & Small Appliance REPAIR - TROWBRIDGE & FLYNN
