

When you can't take time out
... take BUFFERIN®

BUFFERIN acts twice as fast as aspirin to relieve pain

Won't upset your stomach as aspirin often does

When pain makes you feel that you can't possibly go on, remember this:

Bufferin acts *twice as fast* as aspirin . . . to relieve headaches, painful cold miseries, muscular pains and other discomforts. That's because Bufferin combines aspirin with two special antacid ingredients that speed the pain reliever into the blood stream.

What's more, Bufferin won't upset your stomach as aspirin often does. You can even take it in the large, continuous doses often needed for temporary relief of minor arthritic pain and you'll have no ill effects afterward.

Ask your doctor about faster, safer Bufferin.

If you suffer from the pain of arthritis or rheumatism, ask your physician about Bufferin.
