The Medical Roundup

A New Pill for Diabetes

Many ask if the new pill for diabetes is effective and safe. The reports coming in from all over the world indicate that the new drug that can be taken by mouth is effective mainly in cases of the mild type of diabetes that is seen in older persons. It can seldom be used for the severe type of diabetes of young people. Such persons still must take insulin, and this must be injected with a syringe and needle.

The effects of the new drug should be watched by a physician because, sometimes, the action is erratic. Often, also, the patient, if he is to avoid serious trouble in his eyes, his arteries, his kidneys and his heart, must stick strictly to his diet. He is likely to pay heavily for occasional binges of reckless eating. His doctor may forgive him, but his arteries won't.

Boils on the Skin

Many people ask what they can do to stop getting so many boils. Sometimes a person will get one after another. Such persons should go straight to a physician and get their blood sugar measured, because they may be coming down with diabetes. In many cases the patient is a big strong healthy person, and no one can tell him why he is having so many boils. Boils often attack the powerful oarsmen rowing on a varsity crew, and they attack wrestlers. One can hardly advise a powerful athlete to get rid of his boils by improving his general health or by changing his diet. We physicians do not know why the skin of an athlete can lose its resistance to a staphylococcus, a common germ which is probably in the air all around us. It is to be hoped that some day we doctors will understand what has gone

Science Shrinks Piles

New Way Without Surgery

Finds Healing Substance That Does Both—Relieves Pain—Shrinks Hemorrhoids

New York, N. Y. (Special)—For the first time science has found a new healing substance with the astonishing ability to shrink hemorrhoids and to relieve pain—without surgery. In case after case, while gently relieving pain, actual reduction (shrinkage) took place. Most amazing of all—results were so thorough that sufferers made astonishing statements like "Piles have ceased to be a problem!"
