

**VISITING CHILDREN'S HOSPITAL**, Washington, D. C., England's Queen Elizabeth is presented bouquet by June Bell, 3. At left is John Wayne Perry, 5½, polio victim, who later gave Queen football for her son, Prince Charles. (International Soundphoto)

**Ike Gives Painting To Queen Elizabeth**

Washington — An amateur painter Dwight D. Eisenhower has presented his latest work to Queen Elizabeth—an oil portrait of her young son and heir, Prince Charles.

The White House announced that the President made the presentation Friday night during an exchange of gifts at the White House.

He painted the 20 by 24 inch portrait from a description given by a "friend in the British Embassy" and a five by seven inch black and white photograph and colored pictures clipped from magazines. In the lower left corner it bears the long-hand initials, "Ike."

**RETIRED OIL MAN DIES**

Palo Alto, Calif.—William H. Pinckard, 63, retired chairman of the California Texas Oil Co., Ltd., died Sunday after a brief illness.

**Light Bulb Proceeds To Assist Children**

The annual sale of electric light bulbs by the Crater Lions will be held Tuesday evening in Medford. Proceeds from this yearly event will pay for glasses for children who are unable financially to buy them.

The bulbs will be sold in three different sizes in packages of ten bulbs. The door-to-door selling will be held Tuesday from 6 to 9 p.m.

MEDFORD (OREGON) MAIL TRIBUNE—FIVE

**Actor, Publicist Face Drug Charges**

Hollywood, Calif.—Actor Scott Brady and publicist Desmond Slattery today faced arraignment on charges of violating state narcotic laws.

The 33-year-old Brady, brother of Lawrence Tierney, and Slattery, 43, were arrested late last week in a raid by narcotic officers on the home they shared in the Hollywood hills.

Officers said they found a marijuana cigarette at the house but Brady claimed he and Slattery were framed. Police said they had been tipped dope parties were being held at the home.

**EX-COPY EDITOR DIES**

New York—Ira W. Bird, 69, retired New York Times copy editor, was found dead Sunday in the alley beneath his seventh floor hotel room. The death was ruled an apparent suicide.

**NO REPRESENTATION**

Chicago—More than 60 kinds of foreign bread and bread products will be shown at the American Bakers Association Convention Tuesday. No Russian rye, though.

No purchase necessary. Tickets freely given to anyone over 18 years of age. Winners will receive letter and claim their turkey anytime before Thanksgiving.

**OPERATION "MUTNIK"**—This is a photograph of a dog travelling through space in a rocket 130 miles above the earth, published October 16 in a Soviet Navy newspaper. The huskie-type dog is shown in a Russian rocket some miles above the previous height ascended by a living being. The clock-like instrument above the dog records the animal's reactions. The newspaper, Soviet Fleet, said that more than one dog had been sent up and that all had been parachuted back to earth.

**O & C Timber Low In Quarter Prices, Supervisor Reports**

Prices paid for O & C timber in western Oregon ran about 20 per cent lower during the first quarter of fiscal 1958, according to Virgil T. Heath, Oregon State supervisor for the bureau of Land Management.

Heath was comparing the current fiscal quarter with the same period two years ago. He said the average price paid for timber during the first three months of fiscal 1956 was \$35.04 per thousand board feet compared to \$27.62 this year and \$33.53 just a year ago.

During the first three months of fiscal 1956 (July-September, 1955) BLM's five O & C districts sold 122,624,000 board feet of timber valued at \$4,297,114. Last year sales were 113,009,000 board feet at \$3,789,384 and this year the sales totalled 104,449,000 valued at \$2,884,976.

"Income from salvage sales is off 50 per cent from our 1955 level and green timber income is down 21 per cent," Heath said.

He pointed to sales of green timber totalling 84,694,000 board feet valued at \$2,747,690 in the first three months of fiscal 1956 compared to sales of 77,426,000 valued at \$2,170,550 this year. Salvage timber sales in July-September, 1955, totalled 37,930,000 board feet valued at \$1,549,423 compared to 27,023,000 board feet valued at \$714,425 this year.

**Library To Re-open In Shady Cove Shop**

Shady Cove—The county library station at Shady Cove was scheduled for re-opening today in the Treasure Trove shop, according to library officials.

The proprietors of the store, Mr. and Mrs. Carol Watson, have made the space available and served as librarians without pay for a number of years, it was explained.

A collection of 100 books has been deposited at the station which include fiction, non-fiction, and children's books, County Librarian Helen Webster said. These books will be exchanged for others at the Medford Public library as they are "read out."

**Continue Atom Tests, Radiation Men Urge**

Washington—A group of radiation experts advised the government to continue atomic weapons tests but only at the minimum rate necessary for scientific and military purposes.

The experts, members of the Atomic Energy commission's advisory committee on Biology and Medicine, said the harm caused by radioactive fallout from tests "is well within tolerable limits." But this, a committee report said, is not generally realized. So it recommended:

"In view of the adverse repercussions caused by the testing of nuclear weapons, the committee recommends that tests be held to a minimum consistent with scientific and military requirements and that appropriate steps be taken to correct the present status of confusion on the part of the public."

Tests are 'Justified'

"The committee said "it seems obvious" that if the United States wants "to maintain a first class military organization for the safety of the country, we must at least keep abreast of new weapons developments."

"This cannot be done without tests," it said, adding:

"Therefore in terms of national security, necessary tests of nuclear weapons are justified."

Russia currently is staging tests in Siberia and Britain and the United States have recently concluded 1957 test programs. This country has announced it will stage new tests in the Pacific starting next spring.

**U.S. Fallout Alone Average**

The committee based its conclusions on estimates of worldwide contamination by fallout in the past and in the indefinite future if tests by all nations are continued at the rate of the past five years. It emphasized that fallout in the United States has been considerably larger than the world average.

**A GOOD JOB**

Riva Del Garda, Italy—Skin divers went into a reservoir filled with several thousand gallons of wine last night to repair a safety valve which had become plugged and threatened to flood several blocks of the town with fermenting grape juice. The divers, equipped with oxygen tanks and goggles, worked "underwine" several hours to repair the damage.

considers that the harm being done at the present rate is "tolerable" it warned that if more and more countries embark on test programs "the situation may well become serious."

Assuming tests will continue at the rate of the past five years, the committee made estimates of fallout damage in four categories:

The increase in genetic defects, or damage to reproductive cells which is passed on to future generations, the increase in the number of deaths caused by leukemia, a blood disease; the increase in bone tumor cases; and the life-shortening effect of fallout radiation.

It's a dear bargain to buy insurance from the "sell 'em and forget 'em" agent who doesn't bother keeping a professional eye on your constantly changing insurance requirements.

*We have a hunch you'd rather BUY FROM AN AGENT*

who takes a personal interest in you and your family, who takes the time to review your needs periodically so that you never have too little—or too much—insurance.

That's how this Agency conducts its business.
