

Milwaukee Boy, 10, Killed by Automobile

Milwaukee, Ore.—William Arthur Johnson, 10, Milwaukee, was killed Wednesday night when his bicycle was struck by a car.

The driver, Jack Wiseman, 20, Clackamas, told police he did not see the bicycle until he was almost upon it. Police said the bicycle had no lights and that it was foggy at the time.

Man Questioned in Secretary's Death

Baton Rouge, La.—Police questioned a Chicago man Thursday in connection with the slaying of a New Orleans church secretary during an abduction - robbery last month.

Officers identified the suspect as Joseph Edward Lutikas, 37, and said they found two automatic pistols and three large knives in his car. One of the knives bore bloodstains.

Lutikas first denied, then later admitted, that he was in New Orleans on the night of Oct. 23, when the Rev. Martin W. Hollis, 69, and his secretary, Miss Maud Lind, 37, were taken on a two-hour ride of terror, investigators said.

The suspect also fits a description of the bandit given by the minister. Lutikas was given a lie detector test and the result was expected today.

The attacker held a gun on the minister and Miss Lind as they left a church meeting and forced the Rev. Mr. Hollis to drive around for more than an hour. Then he beat both with a pistol and slashed them with a sharp instrument.

Miss Lind died of strangulation from a handkerchief shoved down her throat, according to a coroner's report, but would have died anyway from a severed jugular vein.

The minister was seriously injured but has since recovered and been released from the hospital.

Salem.—The House defeated for the second time a motion to take Senate bill 1 from the House Rules Committee. The vote was 36-19.

Portland.—A robber held up the Portland Trust bank in the downtown section of the city Thursday and escaped with an estimated \$1200, police reported.

Metallurgical Tests to Continue At Illinois Valley Nickel Mine

Cave Junction — While the work of ascertaining about how many tons of nickel ore and of what grade is in its final stages in the Illinois Valley, metallurgical tests will continue all winter, Lionel Simard, consulting engineer for Nickel Corporation of America, said.

On the findings of these tests, to be conducted in Canada and probably New Orleans, will hinge the future of nickel mining in this locality.

"We must find out if materials here can be made to pay," Simard said this week, in describing various leaching processes under consideration for this type of ore. He painted an optimistic picture when he compared valley deposits to those in Cuba.

Saying local ore is very similar to Cuban deposits, he told of two plants already in operation there. One, using an ammonia leach process, has proved profitable, but newer acid leach is believed to be more successful.

at the Freeport Sulphur plant on Moa Bay property. Ore here is partly treated in Cuba, then shipped to New Orleans for final processing.

Acid Leach Process
The acid leach process is the one which will probably be used for Illinois Valley ore, if metallurgical tests give the green light to large scale mining here, he said.

Simard indicated a chemical plant might be built here, so that acid can be made on the site. This would be only a small part of the nickel extracting operation in this area, should ore prove up in metallurgical tests.

The Toronto consultant also stated Edward N. White, president of Nickel Corporation of America, is finalizing arrangements to ship samples to the Freeport Sulphur plant in New Orleans for testing. A request has already been made to General Services Administration for use of the government-owned

plant for a test run.

Van H. Smith, a well known metallurgist, has joined the Toronto firm of Simard and Knight as an associate consultant. According to Simard, he is to direct the testing processes for Illinois Valley ore this winter.

Open Pit Work
Open pit work on Eight Dollar mountain is nearly completed, and only a few more explorations are scheduled for Woodcock mountain. The amount and grade of ore has been announced as adequate for further tests.

Simard, who has been in the valley since late October on a survey of operations, will leave early next week for Canada. While here he also made a preliminary exploration of nickel mine claims in the High Plateau region in back of Gasquet mountain across the California state line. He was assisted in this work by Murphy Hicks of the valley, who has mining property in this area.

The California exploration has no connection with Illinois Valley work, although the consulting firm of Simard and Knight has been retained in both instances. Exploration is similar to that first done on Woodcock and Eight Dollar mountains and will determine the advisability of going into a more extensive plan of drilling and taking ore samples. It is believed ore here is much the same as that in the valley.

Quotes From the News

By UNITED PRESS

Washington—President Eisenhower, in saying one of the most difficult problems in perfecting an intercontinental ballistic missile was firing it into space and bringing it back to earth without having it burn up from atmospheric friction:

"Our scientists and engineers have solved that problem."

Cambridge, Mass.—Massachusetts Institute of Technology President James Rhyne Killian Jr., appointed by President Eisenhower as special White House assistant in science:

"The potential for scientific advance is tremendous, and I feel that there is a sense of urgency, mission and dedication in the scientific and engineering community of the United States capable of meeting the need."

Buffalo, N.Y.—Dr. Clifford Furnas, chancellor of the University of Buffalo and former secretary of defense for research and development, in hailing Killian's appointment:

"The President is definitely getting far better advice on the impact of science to our national posture."

Washington—Assistant Defense Secretary Paul D. Foote, in denying charges before a congressional subcommittee that inter-service rivalry delayed the U.S. satellite and rocket programs:

"This is absolute nonsense. The rivalry that has existed has accelerated the missile program. The real reasons we are behind is that the Russians started earlier."

Washington—Rep. James C. Davis (D-Ga.) on President Eisenhower's appointment of the new civil rights commission:

"Of course, I am unalterably opposed to any civil rights commission, and I fought it as vigorously and as long as I could. The whole thing is outrageous, totally unnecessary, and can result in no good either for Negroes or whites."

Hearing Scheduled on Trailways Bus Rates

A hearing has been scheduled at 1 p.m. Wednesday, Nov. 13, in Salem on a proposal to change rates for bus service by Continental Pacific Trailways.

Rates would be changed to include Albany and Ashland. Fares proposed from Ashland are 50 cents to Medford and Grants pass; 95 cents to Roseburg; \$1.45 to Eugene, \$1.65 to Albany, \$1.70 to Salem, and \$1.95 to Portland. The special charges are at present effective on one schedule, and under the proposed would be made effective on all schedules, according to Public Utilities Commissioner Howard Morgan.
