

Recording Contest Cancellation Brings Feeling of Suspicion

By ELMER C. WALZER
United Press Financial Editor

New York—The American has a billion dollar hi-fi business, including the sets, records, etc. And no nation comes close to this branch of musical reproduction. And then there's the American jazz which is unique with the United States—or so the Belgian World's Fair people would tell you.

Elmer C. Walzer

Anyhow therein lies a controversy which is gathering world-wide notice. And Russia may brag she has beaten the U. S. in cultural achievement.

There was supposed to be a contest on recordings in which each nation represented at the Belgian fair would submit three records each in 14 categories. It looked as if the U. S. would win hands down and make Russia look like a sucker.

The United States group asked the music critic of Saturday Review to help get selections into line. Before Irving Kolodin could get his records into an envelope came a letter telling him the contest was off.

Belgium called off the contest and Kolodin, writing in the current Saturday Review, gives the impression that the Belgian government was in cahoots with Russia on that little deal.

He doesn't say so in so many words, but in connection with the cancellation, he has this to say:

"Could it be that the cancellation was possibly related to Russia's well-known deficiency in the field of high fidelity recordings? The subject seems hardly worthy of an international incident but when actions are unexplained suspicions are rampant."

Kolodin notes that Russia seems to be choosing the activities in which it excels and warns against a half-hearted, penny-pinching participation by the U. S. "that would be worse than no participation at all."

So it goes. And so it goes all through the cultural field. Russia is sending vast numbers of works of art to the exhibition and is spending some \$60 million, against the U. S. spending on one-fifth that amount at the fair.

We are going to have the same trouble in the theater, says Henry Hewes, theater critic of the Saturday Review. We've got to be careful about offending any of our allies, which leads him to remark:

"All this makes one wonder if it wouldn't have been simpler to follow Rose's suggestion that we send an aquacade. Long stemmed American beauties are uninhibited, inoffensive and impressive. Furthermore, they lose nothing in translation."

To all this the American group handling Belgian fair publicity says "no." The U. S. will make a good showing at the 500 acres of fair to be held from April 17 to Oct. 19 this year, it asserts. Perhaps, say the cynics, Coca-Cola will give us the pause that refreshes.

Sammy Davis Jr. To Marry Dancer

Las Vegas—Sammy Davis Jr., actor-singer-dancer, said today he would marry dancer Loretta White Friday at the Sands hotel.

Davis, bubbling happy over plans for his first marriage, said he had known Miss White for three years and that they had secretly been engaged for almost two years.

"I've wanted to tell everyone for a long time but Loretta had been married in Mexico eight months ago to a non-professional and it was being annulled. Yesterday her attorney said the annulment had gone through and we could go ahead with our plans," Davis said.

A honeymoon will be postponed until they finish their current commitments. Miss White is appearing at the Silver Slipper. Davis concludes his Sands appearance Jan. 21.

POWER ON PROBATION
San Juan, P. R.—Kansas City first baseman Vic Power, playing winter ball in the Puerto Rican League, has been placed on probation until Feb. 15 by league president Carlos Garcia. Garcia said the action was taken "for the good of the league" because of a recent fight between Power and umpire Jim Walsh.

Mothers Visit Sons Imprisoned On Spy Charges

Tokyo—Three American mothers held their first visits today with their sons imprisoned in Communist China on "spy" charges.

The Communist New China news agency reported that Mrs. Ruth Redmond, Yonkers, N. Y., met her son Hugh, 38, in a Shanghai jail for their first reunion in more than 11 years.

A later broadcast said Mrs. Mary W. Downey, New Britain, Conn., mother of John T. Downey, 27, and Mrs. Ruth Fecteau, Lynn, Mass., mother of Richard G. Fecteau, 30, saw their sons in Peiping.

The news agency quoted all three mothers as saying their sons appeared in good condition.

Accompanying Mrs. Downey on her visit was another son, William. He, the three mothers and a U. S. attorney, A. L. Wirin, Los Angeles, arrived in Red China Monday as the first Americans to enter the Red-ruled country with the approval of the U. S. State Department.

Downey and Fecteau, Army civilian employees, vanished on a flight to Korea in 1952. They later turned up in captivity in Red China where courts sentenced Downey to life imprisonment and Fecteau to 20 years on espionage charges.

Redmond, former employee of an export-import firm in Shanghai, was called a "professional U. S. agent" by the Communists and sentenced to life imprisonment.

The Communist news agency today made no mention of whether steps had been taken by any of the mothers to appeal to top Chinese Communist officials for the early release of their sons.

FOREMOST DESIGNER DIES
Rochester, N. Y.—Henry F. Kurtz, 70, one of the world's foremost designers of microscopes, died at his home here Tuesday. Kurtz joined the Bausch & Lomb Co. in 1901 as a glasscutter and retired in 1949 as chief of mechanical design of new products for the firm. He was considered responsible for the firm's pre-eminence in the microscope field.

Salem—A two million dollar shopping center will be built just east of the city limits here, realtor Al Isaacs has announced.

Young Man To Live in Space Chamber Under Conditions of Voyage To Moon

San Antonio, Tex.—A young airman from New York will enter a three-by-five foot space chamber next month in an attempt to live a week under the same conditions that will face man on his first voyage to the moon.

Airman 1-C Donald Farrell, 23, volunteered Wednesday to enter the tiny cubicle at the School of Aviation Medicine at Randolph Air Force Base. Officials at Randolph said the cubicle was believed to be the only one of its kind in the world.

Unable To Stand
Doctors at the School of Aviation Medicine said the six-foot airman would remain in the chamber for a week, seated in a canvas chair. He will be unable to either stand or lie down, and will be completely cut off from the outer world except when food is passed in to him.

Attached to the chamber will be a second small rectangular cubicle which will contain radar, radio and other instruments needed for a voyage into space.

Oxygen supply will be controlled by a special apparatus and chamber pressure will be maintained to simulate flight conditions at 18,000 feet.

The only clothing Farrell will wear during his week-long "trip to the Moon" will be regulation trousers and T-shirt. No other clothing will be required because temperatures will be regulated.

No Kind of Medicine
Neither pressure suit nor oxygen mask will be included, and Farrell will not be given any kind of medicines. Instrument recordings of blood pressure, respiration and pulse will be made.

During the simulated flight to the Moon, Farrell's body wastes will be absorbed by chemicals and moisture excreted from his lungs, sweat glands and otherwise will be reclaimed and purified for drinking water.
