

When you can't take time out...take **BUFFERIN®** Acts twice as fast as aspirin to relieve pain!

1. Medical science knows that a pain reliever must get into the blood stream to relieve pain.

2. Bufferin combines aspirin with *Di-Alminate* (antacid ingredients). These speed the pain reliever out of the stomach and into the blood stream *twice as fast* as aspirin. So...

3. Bufferin acts *twice as fast* as aspirin to relieve pain. And it won't upset your stomach as aspirin often does.

Won't upset your stomach as aspirin often does!

Searing lights streaming at you out of the darkness, a throbbing headache . . . nothing could say more clearly, "Stop and take some Bufferin."

Bufferin acts amazingly fast to relieve your pain. Only Bufferin adds to aspirin an exclusive compound of two antacid ingredients called *Di-Alminate*. Result: Bufferin acts twice as fast as aspirin—won't upset your stomach as aspirin often does.

Next time you travel, be sure to carry Bufferin with you. It's the *modern* answer to pain.
