GOOD NERVOUS INHERITANCE A WONDERFUL THING...

I just received a letter from a couple who urge me to keep talking about the inheritance of nervous system disorders. They say that years ago, when they, who are second cousins, were getting married, they were so encouraged to hear from a genetic counselor that laws of genetics which are so definite for animals apply also to man. They felt so happy about this because, when they went back over their two families, talking things over with their parents and grandparents, they were delighted to find that in three generations there hadn't been a single case of any mental disturbance or epilepsy or mental retardation.
