Gilbert Mack, principal of the Gold Hill schools, said teachers in both schools are making a study of reading. The meetings are held each Wednesday after school and consist of reports, discussions, film strips and outside speakers.

The purpose is to try to determine the cause of reading problems in the schools, what the problems are and specific ways to correct or eliminate them. Another purpose is to help the teacher learn to distinguish between the disabled readers, and retarded readers.

He said among results teachers hope to achieve are to develop a reading program that will continually challenge each child, to develop proper remedial techniques and methods of teaching reading so each teacher can better meet the individual needs of each child, to develop a better reading program for the gifted, to teach children to read while they learn, to present a program to encourage children to read widely for recreational purposes, and to increase speed and comprehension in reading and development of these skills so that they will continue in adult life.
