The Medical Roundup

by *Walter Alvarez*

A Woman Does Not Mark Her Child

Many a pregnant woman worries terribly and is very unhappy because she assumes that her child's tendency to convulsions or his lack of intelligence or his lack of sanity is due to the fact that, when he was conceived, she was very unhappy over something, or her husband was drinking. Actually, if she knew even a little about genetics, she would have known that these conditions could hardly have had any influence on her child.

When a woman is in her childhood, her ovaries already contain the ova (little eggs) that she is going to use in years to come. Similarly, the man is forming spermatozoa for some time before he is likely to use them. Hence it is that the mental or physical condition of the mother or father at the time of conception cannot influence the intelligence or health of the child that is to come.

Mothers are wrong, also, when they think that they have "marked" the child born with a red birth-mark or a hare-lip. Experts tell me that when the mother thought some fright had marked the child, he was already so fully formed that it was too late to put such a defect on him. The defect was fully developed very early in the development of the infant.

Albumin In The Urine

Many persons are much frightened when told that there is some albumin in their urine. Immediately, they think they have Bright's disease, and that their days are numbered. Actually, there are several fairly harmless conditions that can produce a trace of albumin in the urine. There are some people who have a little albumin in the urine only when they are on their feet; it disappears when they are lying down. This does not do any harm. Other persons have a little leakage of albumin into the urine, in spite of the fact that, by all tests, there is plenty of good kidney tissue to keep the person healthy all his days. Many a time, at the Mayo Clinic, I found a little albumin in the urine of a person who had just come in very tired from a long journey. Later, when he was rested, he had no albumin. Many persons with a high blood pressure or a diabetes will usually have a little albumin in the urine.

There are some children who have enormous quantities of albumin in the urine with what is called nephrosis. It is a disease we don't know much about, but today many of the invalids are being helped with cortisone and other drugs. Often these children become so water-logged that they swell up all over and even their face may be swollen.

In many cases, a person's kidneys were injured when he was a child, perhaps when he had an acute tonsillitis, or streptococcal sore throat. He may then continue to have albumin in his urine for the rest of his days, but still his life may not be shortened.

The wise physician, when he finds some albumin in the urine, tries to find, if possible, if there is serious damage to a certain test made which will give him a pretty good idea of the amount of kidney tissue which has been destroyed. If the kidney function is still

Residents Warned About Phone Sales

Don McNeil, manager of the Jackson County Chamber of Commerce, has cautioned residents of southern Oregon to beware of high-pressure telephone salesmen offering securities.

Citing a warning issued by the National Better Business Bureau, with which the Chamber is affiliated, McNeil said that many inexperienced investors are receiving high-pressure telephone calls from self-styled brokerage firms in New York and Canada. The salesman, he said, urge the purchase of shares in obscure or highly speculative companies.

Because of the increased "boiler room" activity, McNeil said the U. S. Securities and Exchange commission has warned investors to protect themselves by not dealing with strange securities firms, beware of promises of spectacular profits, and give at least as much consideration to buying securities as you would purchase any valuable property.

Church-Sponsored Film Picketed in Portland

Portland - A church-sponsored motion picture shown at Benson high school here was picketed Tuesday night by members of the Theatrical Employees union who said the Jim Bond film was using non-union ticket takers, ushers and ticket sellers.

Carlsbad Caverns National Park was established in 1930.

4-H CLUB NEWS

Nimble Thimbeles

The Nimble Thimbeles Sewing-Knitting club held a meeting on Saturday, Feb. 8. The club decided that they would not work on the Friendship Follies this year but we are planning on having a display in a window in Central Point during National 4-H club week. We also discussed material for our odds and ends "sacks" we are keeping to send to the children's ward at one of the hospitals. We talked about tours we would like to take later this year.

Colleen Franek gave a demonstration on how to thread a sewing machine. Patsy Charley gave an illustrated talk on how to give a demonstration. The next meeting will be held on the second Saturday of March.
