If You Think You're Confused . . .

Fabulous ACRILAN? VISCOSE? Synthetic Fibre? DACRON? TRYCON? PERMA PAD? RAYON? Chromspun? NYLON? COTTON? Acetate?

Imagine OUR DILEMMA

We at Laurine's Carpet House have been besieged during the past few weeks by representatives of carpet mills throughout the Nation with glorious statements about their respective products.

Every claim boils down to supposedly scientific virtues of their latest synthetic concoctions that will challenge wool as a material for carpeting. And to be candid, we must admit that their symphony of words almost makes us wish for a musical background so we could hop on their miracle fibre bandwagon.

But by sticking to facts, we must confess that we're not chemists, but carpet people who have been actively engaged in buying, selling and laying of fine quality ALL WOOL rugs and carpets for several years. With this background, we can dispute with experience and authority. For example, substitute fibers have not yet duplicated the beauty, resiliency and long-wearing qualities of all wool.

Frankly, at this point, we believe it is impossible to choose proper substitute fibre which contains all the attributes of wool. AND, after serious consideration of our customer's carpet requirements, we will continue to carry "Time Proven" ALL WOOL carpets in our organization.

At Laurine's Carpet House you'll find the largest selection of fine ALL-WOOL broadloom in Southern Oregon. You buy from the actual roll . . . stocked in our daylight salesroom.
