

**TO VIE IN FESTIVAL**—Two Medford Y volleyball teams will contend on Saturday in the Pacific Northwest YMCA Sports festival at Vancouver, Wash. They are the Y-Nots and the Y-Ettes. The group left today and will play matches this evening in Portland. The six ladies in the left half of the picture are on the Y-Nots team and the

five on the right side are Y-Ettes. From left to right the players are, front row, Donna McCall, Viva Lewis, Donna Hadley and Carol Rose; center, Jeri Hutton, Lanell Wilkes, Kay Miller and Teresa Short, and back row, Joan Kidd, Lucille Cornelius and Vicki Fowler. Not shown is Virginia Wick-ershaw of the Y-Ettes.

## Crater Tornado Foe Here This Friday

Medford high will fight for its first Southern Oregon conference victory and Crater will seek second spot alone, and possibly a first place tie, Friday afternoon in a base-

ball doublebill on the Medford Tornado's diamond. First game is set for 2:30 p.m. It will count in the league standings while the second game will be a non-conference scrap. Grants Pass, now leading the lop has a similar doubleheader at Klamath Falls. Crater is now tied with Ashland in second spot. The schools have one win and one loss each. Grants Pass heads the circuit with two wins and no setbacks and Medford and Klamath each have lost their only loop action.

Since Ashland plays at Eagle Point, outside the conference Friday, a Crater win over Medford would put the Comets in lone second position. The Comets could get a knot for first should Klamath beat GP in the counter contest.

However, the Crater crew will run into a young Black Tornado aggregation determined to hit the win trail again after six successive setbacks. Medford at the start of the season did well in the fielding and pitching departments but its hitting was not in stride. Last week saw improvement in hitting but pitching and fielding did not hold up.

This week end the Tornado hopes to have both its offense and defense in peak form. It also has non-league jaunt to Roseburg for two games on Saturday.

**Fowler May Throw**  
Bob Fowler may pitch in the first game for Crater, with either Bill Anborn or Wayne Allen on the hill for the second. The Comets have much young talent themselves.

First game line-up may be Randy Campbell, catcher; Charlie South, first base; Thurman Striplin, second base; Allen, shortstop; Dennis Pfaff, third base, and Jerry Korbak, Bryan Sewell and Dave Brown, outfielders.

Dennis Barr may get the opening hill call for Medford with either Tom Laurance or Jerry Anderson in the wrap-up. For the other posts it may be Ken Jensen, catcher; Lowell Dean, first base; Ray Konopasek, second base; Ken Durkee or Larry Brown, third base; Cal Dean, shortstop; Ron Peery, centerfield; Frank Peterson or George Ice, left field, and Dick Durante or Jerry Fields, right field.

A goal by defenseman Noel Price in the final minute was the clincher in a wild, nip-and-tuck battle which saw the lead change hands four times. The Indians held a 2-1 lead at the end of the first period, but the favored Bears roared back with three goals in each of the last two sessions.

## HOCKEY

**AMERICAN LEAGUE**  
Springfield, Mass.—The Hershey Bears return home today, needing only one more victory to sew up the American Hockey league playoff title.

The Bears nosed out the born Springfield Indians, 7-6, at Springfield Wednesday night to take a commanding 3-1 lead in the best-of-seven final series.

A goal by defenseman Noel Price in the final minute was the clincher in a wild, nip-and-tuck battle which saw the lead change hands four times. The Indians held a 2-1 lead at the end of the first period, but the favored Bears roared back with three goals in each of the last two sessions.

The Bears won despite a brilliant performance by Paul Ehman, who scored four goals for the losers.

**SKINS DROP GAME**  
Jacksonville — Jacksonville high's Redskins have been hitting the ball well but defense has been their trouble in baseball. Errors hurt again Tuesday when the Skins lost 8 to 7 to Rogue River in a non-league fracas. Jacksonville dropped its first league game to Prospect last week end by the unusual score of 24 to 23. The game took 4 1/2 hours to complete at Prospect.

## Hunting & Fishing Southern Oregon

By MEL REES

It is still a little early for the heavy runs of chinooks (if we get any heavy runs) but some nice fish have been reported. According to the scoreboard for the salmon derby at Milo's Sporting goods in Grants Pass Art Hege registered a 20-pound fish; Bill Bickers 21; Fred Hansen 24; Helen Hanson 10 1/2; L. T. Moore 16, and Art Schmedell of Medford 21. Ralph Newman still holds the high spot with his official 27 1/2 pound entry. Winning fish should run over 30 pounds, if other years can be used as a gauge. The water is in prime condition but last Sunday someone was "fiddling" with the dam and the water was being raised and lowered at intervals. This made fishing very poor. Late Sunday evening a couple of fish were hooked in this spot and lost.

**FISH SCREENS IN**  
According to latest information the water will be allowed to run under the Savage Rapids Dam this week due to the fact that the Grants Pass Irrigation District is cleaning debris from the structure in preparation for the filling of the lake beginning the first of next week. With the river at normal flow the salmon fishing should be pretty good for this week.

The long awaited fish screens have been installed on the turbines at the dam and will go into operation next week when the gates are closed to form the lake. It is felt that these screens will materially help the steelhead program.

**GALICE PRODUCES**  
Several fish were taken just below Hell's Gate and in the Galice and Rand area. These spots can be expected to produce fairly well as we go into the middle of the season.

**STEELHEAD LIBERATED**  
So far this spring there have been liberated in the Rogue river an estimated \$2,000 summer run steelhead of the one-year and two-year old class. The eggs for these fish were taken from the Umpqua where they have a good summer run of these prime fish. The eggs were hatched at both Bandon and Butte Falls. It is anticipated that some of these fish will return next fall as 15-18 inch fish but the majority will no doubt return in from two to three years.

It is hoped that some of these fish will come back for the May-June run and provide some excellent angling during the first of the trout season. It has been pointed out however, that they may not return until the September-October runs. Even if this is the case it will materially help these dwindling runs of fish.

**SQUAW LAKE CONCERN**  
Of considerable concern to the angling fraternity is the news that Bert and Christine Harris, who own the access property around Squaw lake have stated they will close their land for access to the lake this year. This announcement came after the game commission stocked the lake heavily in anticipation for the coming season, realizing that with the early stream closure there would be undue pressure on our few lakes.

To take this major lake out of the opening fishing picture would no doubt prove a serious blow to early angling. It was our understanding that the Harris had an agreement with the game commission that in order to effect a closure notice had to be given at least three years in advance of the act. If this is so,

## Linfield Takes Dual Track Tilt

Portland—Linfield defeated Lewis & Clark 73 1/2 to 57 1/2 in a dual track and field meet here Wednesday as Bill Machamer of the Wildcats turned in victories in the 220 and 440.

Machamer did the 440 in 50.6 and the 220 in 22.7. Conrad Sundholm of Lewis and Clark won the mile and two-mile and Ron Pauley, also of Lewis and Clark, took the high and low hurdles.

## RV League Will Meet On April 27

A meeting of Rogue Valley baseball league representatives will be held at the Holland hotel in Medford Sunday, April 27, at 2 p.m., it has been announced.

Only clubs represented at the meeting will be given franchises for the coming season, the announcement said. Two meetings held in March failed to produce sufficient interest to organize the league and the coming meeting will be the final effort, it was stated.

Towns invited to send representatives are Ashland, Central Point, Camp White, Butte Falls, Grants Pass, Glendale, Cave Junction, Rogue River and Roseburg. Others interested are also invited. The Medford Cheney Studs won the league championship last year but is not fielding a team for the coming season.

## OSC Paced By Cordy

Oregon State College, Corvallis — Both the OSC varsity and freshman track squads enter competition Saturday in a four-way meet with Lewis and Clark and Willamette on the Pioneers' track in Portland.

The Beavers, paced by half-miler Cliff Cordy and miler Don Fergusson, plus Duane Marshall and Tom Blackstone in the weights, are expected to dominate the meet, although the Rooks, who showed surprising strength in the Willamette relays two week ago, could steal the thunder from their older mates.

Cordy was the brightest light in Oregon State's dual meet effort against Washington last week end, touring the 880 in 1:52.9 to set new records for Oregon State, Bell field and the OSC-Washington dual meet competition. Last year, as a sophomore, Cordy turned the half-mile in 1:54.8 to better the OSC standard, but is showing stronger in his second season, and he could lower his existing mark each succeeding week.

Marshall rebounded from a poor showing in the Northern Division relays to win the shot put against Washington, and Blackstone did the same in the discus.

**GAME WASHED OUT**  
Eugene—Rain washed out a baseball game between Oregon and Portland State Wednesday.  
Almost 95 per cent of Iceland's exports are fish.

## Globetrotters Capture Series

Boston — The Harlem Globetrotters today held their ninth consecutive "World Series" of basketball title despite a final game loss to the college All-Americans.

The college stars won only their fifth game in 18 meetings Wednesday night as Kentucky's Vern Hutton dropped in 23 points to lead the team to an 87-77 victory.

In the nine year history of the competition, the All Stars have yet to top the Globetrotters for the title.

Five times as many men as women are subject to color blindness.

**BUCCOLA NAMED**  
Caldwell, Idaho—Vic Buccola was named Wednesday as assistant football coach and head track coach at College of Idaho. Buccola, 24, was a football star at Cal Poly in 1954.

Where we stand in the fight against CANCER ...and why your dollars are urgently needed now!

**DECISIVE PROGRESS** has been made in the fight against cancer in the last decade. Today one in every three persons who have cancer is saved. A few years ago it was only one in four.

Still more lives can be saved with what doctors know now, if all adults will have a health checkup every year. Many cancers are curable if discovered early and treated promptly and properly.

The major hope for the future conquest of cancer lies in research. About twenty million Americans living today are marked for death from cancer unless research finds new means of curing the disease, or preventing its onset.

**What new knowledge has been won** to brighten cancer's darkness? High on the list is the discovery of chemicals which cause some cancers to shrink... and put victims of this disease back on their feet for a time. There are sound, scientific reasons to believe that more effective chemicals will come which may possibly cure one or more forms of cancer.

Equally remarkable are the advances in surgery for cancer... permitting wider removal of malignant growths with less risk to patients and far greater chances to control the disease.

The scoreboard of cancer progress also includes methods for treating some cancers with hormones, which prolong the active, useful lives of many patients...

tests for early diagnosis of some common forms of cancer... development of X-rays with power undreamed of 10 years ago... incredibly delicate techniques by which the living chemistry of a single body cell can be studied.

**Immense new research** projects are under way and might be expanded to answer such questions as:

Are the tiny organisms called viruses significant factors in the cause of cancer in man, as they are in some cancers in animals? Why do cancers grow slowly in some patients, rapidly in others? If some people are immune or more immune to cancer than others, how can that immunity be strengthened? What elements in our environment may be causing cancer?

Important findings must be moved from the laboratory table to the hospital bed. The step from test tube to patient is difficult, time-consuming and costly. As research goes forward, and new leads open up, more and more work will be done directly with patients with cancer. Thus, research costs will snowball as science continues to press towards its goal.

**Your support** of the American Cancer Society's Crusade has already brought significant gains in the control of cancer. More lie ahead... will you make them possible? Let your dollars work for you and for your children and for their children.

Send your check today to "Cancer," c/o your local post office.
